Re: Routine Inspection

Greenleaf Landfill

Permit No. 058-013D(C&D)

Forsyth County

Dear Mr. Reid:

On December 7, 2020, a routine inspection of the above referenced facility was conducted to determine compliance with the Rules for Solid Waste Management and the permit. The deficiencies and/or violations noted during the inspection are listed below.

- Size of working face needs to be minimized. (Working face of landfill currently utilized as an unpermitted transfer station where waste is being received and then picked up for transport to another regulated facility.)
- Working face of landfill is not being utilized as required in the D&O with regard to proper cover requirements for exposed waste.
- Exposed litter on covered slopes needs to be cleaned up.

Within thirty (30) days of receipt of this letter, please submit a response on how the deficiency noted above will be corrected. The inspection report is attached for your review and is to be placed in your facility's operating file. If you have any questions, then please contact me at (770) 387-4900.

Sincerely,

Jason Rogers

Environmental Compliance Specialist
