April 10, 2009

Dear Committee Members,

I am writing on behalf of my partners at Forsyth County, Georgia. Over the last five years I have had the privilege to watch their department grow into a self sustaining core business function of the county.

Most recently I was able to learn about the mobile emergency operation team they have planned, developed and now deployed. The team has put into place an operation that can be set up and deployed quickly in the event of an emergency.

It is truly a pleasure to work with a group such as the Forsyth County GIS Department. They use smart planning to lay out projects, infrastructure and now, emergency response plans. I have used them on more than one occasion for references and case studies for users in my area. Each time they have proven to be a wonderful asset to the GIS Community.

Warm regards,

A handwritten signature in cursive script that reads "Natalie R. Culpepper".
