CHAPTER TWENTY-ONE

OVERLAY DISTRICTS

ARTICLE I, GENERAL PROVISIONS:

21-1.1 **Purpose.** The purpose of overlay districts established by Chapter Nine, Article I of this Code is to conserve natural resources or realize development objectives without unduly disturbing the expectations for development allowed by the existing zoning district provisions applicable to particular properties. The existing zoning district provisions may properly regulate the relevant district, in general, but more specific and targeted provisions contained in an overlay district are needed to accomplish pressing land use objectives.

21-1.2 **Applicability.** The provisions of this Chapter are applicable to those parcels within unincorporated Forsyth County that have particular development constraints:

(A) The protected water supply watershed overlays as designated in Chapter 9 of this Code consist of the land areas that drain to the public water supply intake or water supply reservoir. The boundaries of these overlays are defined by the ridge lines of the respective watersheds and the boundary of a radius of seven (7) miles upstream of the respective public water supply intakes.

(B) The protected groundwater recharge area overlay district, as designated in Chapter 9, consist of all lands within the jurisdiction of Forsyth County, Georgia that are mapped as significant recharge areas by the Georgia Department of Natural Resources in Hydrologic Atlas 18, 1989 edition.

(C) The Etowah River Corridor Protection District overlay district, as designated in Chapter 9, consist of all areas within one hundred (100) feet horizontally on both sides of the Etowah River, in Forsyth County.

(D) Wetland Protection District overlay districts, as designated in Chapter 9, consist of all wetlands within the jurisdiction of Forsyth County.
ARTICLE II, PROTECTED WATER SUPPLY WATERSHED OVERLAY DISTRICT:

21-2.1 Minimum Criteria for the Big Creek Small Water Supply Watershed:

(A) Permitted Uses for Perennial Stream Corridors within a Seven Mile Radius Upstream of a Governmentally Owned Public Drinking Water Supply Intake. All uses allowed in the underlying zoning districts as established by this Code except for those listed in prohibited uses below are permitted in the Water Supply Watershed Protection Overlay District, subject to the following conditions and standards:

1. A buffer shall be maintained for a distance of 100 feet on both sides of the stream as measure from the stream banks.
2. No impervious surface shall be constructed within a 150 foot setback area on both sides of the stream as measured from the stream banks.
3. Septic tanks and septic tanks drainfields are prohibited in the setback areas of (b) above.

(B) Permitted Uses for Perennial Stream Corridors outside a Seven Mile Radius Upstream of a Governmentally Owned Public Drinking Water Supply Intake. All uses allowed in the underlying zoning districts as established by this Code except for those listed in prohibited uses below are permitted in the Water Supply Watershed Protection Overlay District, subject to the following conditions and standards:

1. A buffer shall be maintained for a distance of fifty (50) feet on both sides of the stream as measure from the stream banks.
2. No impervious surface shall be constructed within a seventy-five (75) foot setback area on both sides of the stream as measured from the stream banks.
3. Septic tanks and septic tanks drainfields are prohibited in the setback areas of (b) above.

(C) General Criteria for the Big Creek Small Water Supply Watershed: The following criteria apply to all locations in a small water supply watershed:

1. New sanitary landfills are allowed only if they have synthetic liners and leachate collection systems.
2. New hazardous waste treatment or disposal facilities are prohibited.
3. The impervious surface area, including all public and private structures, utilities, or facilities, for that portion of the water supply watershed within unincorporated Forsyth County shall be limited to twenty-five (25) percent, or existing use, whichever is greater. The impervious surface area requirement shall be calculated based upon that portion of the water supply watershed within unincorporated Forsyth County; discrete parcels or projects will not be required to independently satisfy the impervious surface area limitations set forth above.
   (a) Alternative criteria that provides equal or better protection of the water supply watershed shall also be acceptable if approved by Georgia Environmental Protection Division (EPD).
4. New facilities which handle hazardous materials of the types listed in Section 312 of the Resource Conservation and Recovery Act of 1976 (excluding underground storage tanks), and amounts of 10,000 pounds on any one day or more, shall perform their operations on impervious surfaces in conformance with any applicable federal spill prevention requirements or the requirements of the Standard Fire Prevention Code.

(D) Exemptions.

1. Land uses established prior to the promulgation of the Water Supply Watershed Protection Plan.
2. Mining activities permitted by the Department of Natural Resources under the Surface Mining Act.
3. Utilities are exempt from the stream corridor buffer and setback area provisions of the Water Supply Watershed Protection Plan if the utilities to be located in the buffer or setback areas cannot feasibly be located outside these areas:
   (a) The utilities shall be located as far from the stream bank as reasonably possible.
   (b) The installation and maintenance of the utilities shall be such to protect the integrity of the buffer and setback areas as best as reasonably possible.
   (c) The utilities shall not impair the quality of the drinking water stream.
4. Forestry and agricultural activities are exempt from the stream corridor buffer and setback area provisions of Water Supply Watershed Protection Plans in accordance with the following conditions:
   (a) The activity shall be consistent with best management practices established by the Georgia Forestry Commission or the Georgia Department of Agriculture.
   (b) The activity shall not impair the quality of the drinking water stream.
21-2.2 Minimum Criteria for the Etowah and Upper Chattahoochee Large Water Supply Watersheds

(A) A large water supply watershed has 100 square miles or more of land within the drainage basin upstream of a governmentally owned public drinking water supply intake.

(B) The corridors of all perennial streams in a large water supply watershed tributary to a water supply reservoir within a seven (7) mile radius of the reservoir boundary are protected by the following criteria:

(1) A buffer shall be maintained for a distance of 100 feet on both sides of the stream as measured from the stream banks.

(2) No impervious surface shall be constructed within a 150-foot setback area on both sides of the stream as measured from the stream banks.

(3) Septic tanks and septic tank drainfields are prohibited in the setback area of ii. above.

(C) New facilities, located within seven (7) miles of a water supply intake or water supply reservoir, which handle hazardous materials of the types listed in Section 312 of the Resource Conservation and Recovery Act of 1976 (excluding underground storage tanks) and amounts of 10,000 pounds on any one day or more, shall perform their operations on impervious surfaces and in conformance with any applicable federal spill prevention requirements or the requirements of the Standard Fire Prevention Code.

(D) New facilities located outside the seven-mile radius that handle hazardous materials shall perform their operations on impermeable surfaces having spill and leak collection systems as prescribed by the Department of Natural Resources.
ARTICLE III, PROTECTED GROUNDWATER RECHARGE AREA DISTRICT:

21-3.1 **Permitted Uses.** All uses allowed in the underlying zoning districts as established by this Code except for those listed in prohibited uses below are permitted in a Protected Groundwater Recharge Area Overlay District subject to the following conditions and standards:

(A) The Department of Natural Resources shall not issue any permits for new sanitary landfills not having synthetic liners and leachate collection systems.

(B) The Department of Natural Resources shall not issue any new permits for the land disposal of hazardous wastes.

(C) The Department of Natural Resources shall require all new facilities permitted or to be permitted to treat, store, or dispose of hazardous waste to perform such operations on an impermeable pad having a spill and leak collection system.

(D) New above-ground chemical or petroleum storage tanks, having a minimum volume of 660 gallons, shall have secondary containment for 110 percent of the volume of such tanks or 110 percent of the volume of the largest tank in a cluster of tanks. (Note: These figures are consistent with US EPA rules for oil pollution prevention, 40 CFR 112.1.) Such tanks used for agricultural purposes are exempt, provided they comply with all Federal requirements.

(E) New agricultural waste impoundment sites shall be lined if they are within:

1. A high pollution susceptibility area;
2. A medium pollution susceptibility area and exceed 15 acre-feet;
3. A low pollution susceptibility area and exceed 50 acre-feet.

As a minimum, the liner shall be constructed of compacted clay having a thickness of one-foot and a vertical hydraulic conductivity of less than $5 \times 10^{-7}$ cm/sec or other criteria established by the U.S. Soil Conservation Service; the Georgia Department of Natural Resources, Environmental Protection Division; and/or Forsyth County. (The average size of existing agricultural waste impoundments in Georgia is about 15 acre-feet; sheeps-foot rollers or pans with heavy rubber tires, which are normal equipment for most Georgia earth moving contractors, should be able to compact clay to the recommended vertical hydraulic conductivity.)

(F) New homes served by septic tank/drain field systems shall be on lots having the following minimum size limitations as identified on Table MT-1 of the Department of Human Resources' Manual for On-Site Sewage Management Systems (hereinafter "DHR Table MT-1"):

1. 150% of the subdivision minimum lot size of DHR Table MT-1 if they are within a high pollution susceptibility area; and
2. 125% of the subdivision minimum lot size of DHR Table MT-1 if they are within a medium pollution susceptibility area; and
3. 110% of the subdivision minimum lot size of DHR Table MT-1 if they are within a low pollution susceptibility area.

(G) New manufactured/mobile home parks served by septic tank/drain field systems shall have lots or spaces having the following size limitation as identified on Table MT-2 of the Department of Human Resources' Manual for On-Site Sewage Management Systems (hereinafter "DHR Table MT-2"):

1. 150% of the subdivision minimum lot or space size of DHR Table MT-2 if they are within a high pollution susceptibility area; and
2. 125% of the subdivision minimum lot or space size of DHR Table MT-2 if they are within a medium pollution susceptibility area, and
3. 110% of the subdivision minimum lot or space size of DHR Table MT-2 if they are within a low pollution susceptibility area.

(H) If Forsyth County requires a larger lot size than that required by (F) above for homes or by (G) above for manufactured/mobile homes, the larger lot size shall be used.

(I) No construction may proceed on a building or manufactured/mobile home to be served by a septic tank unless the Forsyth County Health Department first approves the proposed septic tank installation as meeting the requirements of the DHR Manual and (F), (G), and (H) above.

(J) New facilities which handle hazardous materials of the types listed in Section 312 of the Resource Conservation and Recovery Act of 1976 (excluding underground storage tanks), in amounts of 10,000 pounds on any one day or more, shall perform their operations on impervious surfaces in conformance with any applicable federal spill prevention requirements or the requirements of the Standard Fire Prevention Code.
(K) The Department of Natural Resources shall require conservative design in any new permits for the spray irrigation of waste waters or the land spreading of waste water sludge in areas having high pollution susceptibility. This shall be accomplished by comparing the Department’s CRITERIA FOR SLOW RATE LAND TREATMENT (February, 1986 or latest edition) with amendments and other technical publications to site specific information submitted by a registered professional engineer for each project.

(L) Permanent storm water infiltration basins shall not be constructed in areas having high pollution susceptibility.

(M) Exclusive of mining settling basins, new waste water treatment basins shall have an impermeable liner in areas having high pollution susceptibility.

21-3.2 **Exemptions.** Any lot of record on or before February 14, 2000 is exempt from the lot requirements of Section 21-3.1 (F) and (G) above.
ARTICLE IV, THE ETOWAH RIVER CORRIDOR PROTECTION DISTRICT:

21-4.1 Permitted Uses. All uses allowed in the underlying zoning districts as established by this Code except for those listed in Prohibited Uses below are permitted in the Etowah River Corridor Protection District Overlay, subject to the following conditions and standards:

(A) Standards and requirements established in the Metropolitan River Protection Act and the Erosion and Sedimentation Act are not superseded by the Etowah River Corridor Protection District standards.

(B) Protection criteria:

1. The Etowah River Corridor Protection District shall provide for the maintenance of a natural vegetative buffer except as otherwise provided herein.

2. The Etowah River Corridor Protection District shall not prohibit the building of single family dwellings, including the usual appurtenances, within the buffer area, subject to the following conditions:
   (a) The dwelling shall be in compliance with all Forsyth County zoning regulations.
   (b) The dwelling shall be located on a tract of land containing at least two acres. For the purpose of these standards, the size of the tract of land shall not include any area that lies within the protected river (that is, for tracts of land that include portions of a protected river, the area between the river banks cannot be counted towards the two acre minimum size).
   (c) There shall be only one such dwelling on each two-acre or larger tract of land.
   (d) A septic tank or tanks serving such a dwelling may be located within the buffer area.
   (e) Septic tank drainfields shall not be located within the buffer area.

(C) Within the Etowah River Corridor Protection District, industrial and commercial land uses existing prior to the promulgation of the Etowah River Corridor Protection District are exempt from these criteria provided that:

1. Industrial and commercial uses of river corridors shall not impair the drinking quality of the river; and
2. Industrial and commercial activity within the river corridor shall meet all state and federal environmental rules and regulations.

(D) Except as expressly provided for under section (20A-4.1) (b) of these criteria (dealing with single family dwellings within the Etowah River Corridor Protection District), septic tanks and septic tank drainfields are prohibited within river corridors.

(E) The Etowah River Protection District shall provide for the construction of road crossings and utility crossings of river corridors, provided that construction of such road and utility crossings shall meet all requirements of the Erosion and Sedimentation Control Act of 1975, and the Forsyth County Soil Erosion and Sedimentation Control Ordinance (Ordinance No. 73) and any other applicable local ordinances on soil erosion and sedimentation control.

(F) The Etowah River Protection District shall provide the following acceptable uses of river corridors, provided that such uses do not impair the long-term functions of the protected river or the river corridor and are consistent with applicable Federal, Georgia and Forsyth County regulations:

1. Timber production and harvesting, subject to the following conditions:
   (a) Forestry activity shall be consistent with best management practices established by the Georgia Forestry Commission, and
   (b) Forestry activity shall not impair the drinking quality of the river water as defined by the federal Clean Water Act, as amended.

2. Wildlife and fisheries management activities consistent with the purposes of O.C.G.A. 12-2.8.

4. Recreational usage consistent either with the maintenance of a natural vegetative buffer or with river-dependent recreation. For example, a boat ramp would be consistent with this criterion but a hard surface tennis court would not. Parking lots are not consistent with this criterion. Paths and walkways within the river corridor are consistent with this criterion.

5. Natural water quality treatment or purification.

6. Agricultural production and management, subject to the following conditions:
   (a) Agricultural activity shall be consistent with best management practices established by the Georgia Soil and Water Conservation Commission;
   (b) Agricultural activity shall not impair the drinking quality of the river water as defined by the federal Clean Water Act, as amended; and
(c) Agricultural activity shall be consistent with all state and federal laws, and all regulations promulgated by the Georgia Department of Agriculture.

(7) Other uses permitted by the Department of Natural Resources or under Section 404 of the Clean Water Act.

(G) Handling areas for the receiving and storage of hazardous waste are prohibited within river corridors.

(H) Hazardous waste or solid waste landfills are prohibited within river corridors.

(I) The natural vegetative buffer shall be restored as quickly as possible following any land-disturbing activity within the river corridor.

(J) Except as noted above, all construction within the buffer area shall be prohibited.

21-4.2 Exemptions

(A) Land uses existing prior to the promulgation of the Etowah River Corridor Protection District.

(B) Mining activities, if permitted by the Department of Natural Resources pursuant to the Georgia Surface Mining Act of 1968, as amended.

(C) Utilities, (except as discussed above in Section 21-4.1 (E)), if such utilities cannot feasibly be located outside the buffer area (feasibility shall be decided conservatively by the local government), provided that:

1. The utilities shall be located as far from the river bank as reasonably possible;

2. Installation and maintenance of the utilities shall be such as to protect the integrity of the buffer; and

3. Utilities shall not impair the drinking quality of the river water.

(D) Specific forestry and agricultural activities except as discussed above in Sections 21-4.1 (F) 1 and 21-4.1 (F) 6.
ARTICLE V, WETLAND PROTECTION DISTRICT:

21-5.1 **Permitted Uses.** All uses allowed in the underlying zoning districts as established by this Code, except for those listed in prohibited uses below, are permitted in the Wetland Protection Overlay District, subject to the following conditions and standards:

(A) No development permit will issue on a project that appears to contain wetlands until a determination has been made by the Corps of Engineers on whether jurisdictional wetlands exist on the site. If there are jurisdictional wetlands on the site that will be disturbed by the proposed development, the applicant must obtain a wetlands alteration Section 404 Permit from the U.S. Army Corps of Engineers.

(B) If a project appears to contain wetlands, the following note must be printed in bold-face type on all development plans:

*This site contains wetlands. The applicant will first obtain a wetland alteration Section 404 Permit from the Corps of Engineers prior to disturbing any jurisdictional wetlands.*

(C) Prohibited uses of wetland areas include:

1. Receiving areas for toxic or hazardous waste or other contaminants;
2. Hazardous or sanitary waste landfills.

(D) Use of wetland areas without long term impairment is permitted. Acceptable uses may include:

1. Timber production and harvesting;
2. Wildlife and fisheries management;
3. Wastewater treatment;
4. Recreation;
5. Natural water quality treatment or purification;
6. Other uses permitted under Section 404 of the Clean Water Act.
ARTICLE VI, ATLANTA HIGHWAY-MCFARLAND PARKWAY-MULLINAX ROAD OVERLAY DISTRICT:

21-6.1 **Purpose.** The purpose of this overlay district is to establish minimum standards for development, exterior architectural design, parking, fencing and landscaping that contribute to the district's recruitment and retention of businesses. This is accomplished through the enhancement of business and industrial development and redevelopment through the creation of visual interest and design flexibility. Architectural design standards are intended to promote architectural continuity and consistency, corridor landscaping for aesthetic benefit, and flexible parking design to minimize impediments to development. It is the intent of this overlay to allow for flexibility in responding to unique characteristics and constraints inherent with different businesses, specific parcels, and related neighborhood areas.

21-6.2 **District delineation.** The Atlanta-McFarland Commerce Overlay District shall consist of those parcels within the boundary identified on the Official Overlay District Map of Forsyth County. Regulations apply to parcels or portions of parcels that fall within 1,000 feet of the centerline of Atlanta Highway; and parcels or portions of parcels that fall within 500 feet of the centerline of McFarland Parkway; and parcels or portions of parcels that fall within 500 feet of the centerline of Mullinax Road. Where land is classified as within the overlay district, the regulations governing development in the overlay district shall apply in addition to the regulations governing development in the underlying base zoning district. In the event of an express conflict between the standards governing a base zoning district and those governing an overlay district, the standards governing the overlay district shall control.

21-6.3 **Permitted uses.** All uses allowed in the underlying zoning districts as established by this Code, are permitted in the Overlay District.

21-6.4 **Design Plan Administrative Review.** Plan review shall be performed by county staff. Site development plans, architectural elevations, exterior finish plans, and landscape plans must be submitted to the department at the time of application for a land disturbance permit. Lighting plans must be submitted prior to the issuance of a building permit. Submitted plans shall address and conform to all provisions set forth under chapter 21, article VI. Any numerical nonconformance to the standards contained within this Article shall require the submittal of a variance application in accordance with section 8-6.4 of this Code. Should a design not meet all of the non-numerical standards contained within this Article, then the proposed design must be submitted, for public hearing, to the Forsyth County Board of Commissioners for review and approval as an Alternate Design. In considering whether to approve such Alternate Design, the Board of Commissioners shall consider the Special Considerations set forth in section 8-5.5(F)(2)(b) of this Code.

21-6.5 **Exemptions.** Development shall be exempted from Chapter 12, Article XI, additional requirements for large scale retail establishments forty thousand (40,000) square feet or greater, also known as the big box ordinance, with the exception of the requirement of a traffic study.

21-6.5 **Site Design Standards.**

(A) **Landscaping.** The following is in addition to the Tree Protection and Replacement Ordinance.

Landscape strips along right of ways.

1. For all properties, a minimum twenty (20) foot wide landscape strip paralleling the road frontage shall be provided along the proposed future rights of way of Atlanta Highway (State Route 9), McFarland Parkway, and Mullinax Road. Plantings within twenty (20) foot wide landscape areas are required. A minimum of ten (10) feet of the required twenty (20) foot landscape strip shall be located outside of utility easements to accommodate the required trees and shrubs.

2. Landscape strips along the side and rear lot or lease lines. In commercial and industrial districts, landscape strips shall be required along all side and rear lot or lease lines. Each required landscape strip shall meet an average width of ten (10) feet with no portion of the landscape strip less than six (6) feet in width.

3. Minimum buffer and minimum building setback performance standard, as provided in Table 12.2 for properties along a residential, Office Residential, or Agricultural districts.

4. Minimum buffer and minimum building setback performance standard, as provided in Table 14.2, for properties abutting a residential, Office Residential, or Agricultural district.

5. All landscape strips and landscape areas are required to contain a variety of overstory trees with an understory of shrubs and herbaceous materials. Trees shall count towards the tree density requirements of the Tree Protection and Replacement Ordinance. All landscape strips shall contain a minimum of one overstory tree and four shrubs per forty (40) linear feet of strip length. All proposed shrubs shall be a minimum of three-gallon container size and two (2) feet in height at time
Chapter 21, Overlay Districts  
Unified Development Code of Forsyth County  
- 21 - 10 -  

of planting. All proposed overstory trees shall be a minimum three-inch caliper at time of planting. Trees and shrubs may be grouped or staggered and need not be evenly spaced within the strips.  
(6) All landscape design shall incorporate a minimum of forty (40) percent evergreen plantings.  
(7) Creation of a multifunctional landscape, incorporating detention, retention, and infiltration is recommended.  
(8) The required fences shall be incorporated into the design of the frontage landscape strip and shown on the landscape plan.  

(B) **Board Fences.** Board fences shall be installed along Atlanta Highway (State Route 9), McFarland Parkway and Mullinax Road.  
(1) For all properties, four board style black fences shall consist of a minimum of 1-inch thick, 4-inch wide fence board affixed to 4-inch posts spaced a maximum of ten (10) feet apart. The board fences shall be a minimum of four (4) feet and a maximum of six (6) feet in height. Natural stone or brick masonry columns may be used in the fence design.  
(2) Fence materials shall be comprised of treated lumber, fiber cement, vinyl or steel.  
(3) Chain link or coated chain link fencing is prohibited along the road frontage.  
(4) Individual lots of record within residential or agricultural districts are exempt from this requirement.  

(C) **Architectural Building Materials.** The following design standards are established to create architectural consistency throughout the overlay district.  
(1) Exterior building materials on all commercial and industrial development visible from the right-of-way shall consist of a minimum of seventy (70) percent per vertical wall plane of brick, natural or pre-cast stone, stucco, pre-finished colored architectural masonry with a rough-hewn texture, and glass. If multiple establishments are designed for location within one contiguous structure, the minimum percentage requirements may be satisfied with reference to the entire facade rather than individual facade fronts.  
(2) Accent wall materials on all commercial development shall not exceed thirty (30) percent per vertical wall plane. Accent building materials include, but are not limited to, stucco, thin brick, and durable and painted dimension wood. If multiple establishments are designed for location within one contiguous structure, the percentage pertains to the entire facade rather than individual facade fronts. Smooth faced or painted concrete masonry units, eifs, aluminum siding, vinyl siding, and corrugated steel are prohibited.  
(3) Metal coping and metal framing for windows and doors is acceptable.  
(4) Building colors should emphasize earth tones. The use of highly reflective or glossy materials should be limited.  
(5) Retaining walls must be faced with stone or brick.  
(6) For the Atlanta Highway-McFarland Parkway-Mullinax Road Overlay District Warehouse Facade Zone as identified on Exhibit B: Official Overlay District Map of Forsyth County, the following architectural design requirements shall also apply to non-residential buildings within all commercial zoning districts and Restricted Industrial District (M1). Exemption to these requirements shall only be permitted for any remodel of or addition to an existing structure. In the event of a conflict between design requirements noted in (a) and (b) below and other architectural regulations noted within this Code, this section shall control:  
(a) All building sides are to be faced with tumbled brick or brick that is installed according to German smear or weep mortar joint construction techniques.  
(b) Metal entry doors, awnings, canopies, gutters, gooseneck exterior lighting and other decorative elements that are non-structural, architectural details attached to a building facade shall be dark in color with a minimum of three such elements incorporated for every building. Metallic tones of silver, gold, light bronze, bright copper and painted effects that result in a non-muted or lightened appearance shall be prohibited.

Performance standards found in Table 21.6 replace the performance standards contained in UDC chapters 12 and 14 for landscape open space, landscaping and building setbacks.

(D) Parking Area Requirements: Parking lot areas shall be designed to ensure a safe flow of traffic in the business, safe travel of pedestrians, bicyclists and delivery vehicles. The landscape design of the parking area shall maximize natural areas to optimize natural infiltration.

(1) Number of Parking spaces. Spaces are to be provided in the following amounts per 1000 square foot (sf) of Gross Floor Area (GFA):

Many uses and mixed-use projects have a large variability in parking demand. At the option and expense of the applicant a parking generation study may be presented to county staff to validate the parking demand. To be determined by the director, based on a parking generation study by an engineering firm.
(2) Shared Parking on adjacent property. Flexible parking design, to include shared parking arrangements, are encouraged. See chapter 17 of this Code.

(3) Pervious Parking. Gravel parking surfaces may be permitted for uses which require parking an average of less than three days per week during a month; places of worship (not schools); and outdoor recreational facilities with low parking demand. Pervious parking pavers are permitted for all uses. The use of pervious pavers must be approved by the County Engineer. Any conversion from pervious parking to impervious parking surfaces requires the approval of the county engineer and may require additional modifications.

(4) Automobile Screening. All parking areas shall be screened from public view with evergreen shrubs. Shrubs shall be no less than three (3) feet in height as measured from the top of curb of the parking area.

(5) Accessory uses of parking lots and loading areas. Parking and loading areas shall not be used for the sale, storage or repair or dismantling of any equipment, materials or supplies. Semi-tractor trailers may not be used for on-site sales.

(6) Accessible parking spaces. Accessible parking spaces shall comply with all requirements of the State of Georgia.

(7) Parking space and aisle specifications. Parking space and aisle specifications shall comply with chapter 17-2.8, with the exception that the percentage of compact auto parking spaces, may equal up to thirty (30) percent of the entire parking area.

(E) Service, refuse collection and dumpsters. Service areas, storage areas, and refuse enclosures shall be oriented away from view from the right of way and screened from public areas. Service areas and loading areas shall be separated from the primary vehicular and pedestrian circulation areas. All refuse enclosures shall be enclosed on three sides by a brick, masonry, or cementious wall. Chain link fencing is prohibited.

(F) Off-Street Loading areas. Loading and unloading areas shall be located and designed so that delivery vehicles can maneuver safely to and from the public right of way without obstructing or interfering public right of way or any parking space or parking lot aisle.

(1) No area allocated to loading facilities may be utilized to satisfy requirements for off-street parking, nor shall any portion of any off street parking area be used to satisfy the area requirements for loading.

</tbody>
</table>

(2) Loading area minimum dimensions shall be twelve (12) feet x fifty-five (55) feet, with fourteen (14) feet of height clearance.

(G) Bicycle Parking Facilities. All commercial and public uses shall provide one bicycle parking space for every fifty (50) vehicle parking spaces provided; with a minimum of two stalls (a rack) per business address, where the structure is larger than 5000 square feet.

(H) Mechanical Systems. HVAC, utility cabinets, and other mechanical systems must be screened in a manner that is architecturally comparable to the building. Parapet heights should remain in proportion to the overall height of the building.

(I) Architectural and Landscape lighting. In addition to article 16-4.20 Outdoor Lighting, architectural lighting may be used to highlight special features and to enhance ground level pedestrian areas. Lighting an entire building façade or major portion thereof is prohibited.
(J) **Motor Vehicle Stacking**

<td>3 vehicle spaces</td>
</tr>
</tbody>
</table>

(2) Each stacking space shall be a minimum of nine (9) feet in width and eighteen (18) feet in length.
(3) Drive-through lanes must be striped and marked.
(4) All drive-through facilities shall be provided with a by-pass lane a minimum width of nine (9) feet.
(5) Drive-through window(s) are prohibited on the side of a building facing a residential district.

(K) **Screening of Open Storage Yards.** All areas devoted to outside storage of vehicles, merchandise or equipment shall be screened from view from the right of way. Screening may be accomplished by vegetation, a masonry wall, fence or combination of fencing and vegetation. Fences or walls may not exceed eight (8) feet in height. Chain link fencing is prohibited.

(L) **Outdoor display of vehicles, equipment, and merchandise.** Outdoor storage or display of vehicles, equipment, and merchandise to be rented, leased or sold shall not be visible along no more than fifty (50) percent of the frontage of the property abutting the right of way, excluding approved driveways.

(M) **Canopies.** A variety of business offer patrons the safety and convenience of canopies.

(1) The overall height of canopies should not exceed twenty (20) feet.
(2) All elements of islands or canopies that are not operational should be architecturally integrated by use of color, material, and architectural detailing.
(3) Lighting under canopies shall not exceed thirty (30) foot-candles.

(N) **Setback Reduction.** The front yard building setback requirements (Table 21.6) may be reduced without requiring a variance in cases where one or more existing building located wholly or partially within five hundred (500) feet on either side of the proposed building, fronting on the same street of such block, is less than the minimum required front yard building setback as shown on a survey provided by the applicant. In such cases, the setback on such lots may be less than the required setback, but not less than the average of the existing setbacks on the aforementioned lots, or a distance of fifteen (15) feet from the closest edge of the future right-of-way line, whichever is greater.
ARTICLE VII, CASTLEBERRY-BETHELVIEW CROSSROADS OVERLAY ZONING DISTRICT:

21-7.1 **Purpose.** The purpose of this overlay district is to establish minimum standards for site development, exterior architectural design, landscaping, and signage of buildings that contribute to the district’s overall character within a phased development approach to commercial and residential expansion. This is accomplished through the protection and preservation of the district’s rural qualities, enhancement of commercial growth through unity of design and quality architecture, and the creation of visual interest through landscape and architectural features scaled for pedestrian use. Design standards are intended to ensure coordinated design of building exteriors in order to promote architectural congruence, positively impact adjacent properties, and produce buildings that augment the character and appearance of the area. It is the goal of this overlay to promote freedom in design while establishing a baseline for design compatibility. This goal is in accordance with the County’s objective to encourage landscaping, signage, building design, and other development regulations that enhance the image of the County and create value as stated in the economic development section of the Comprehensive Plan’s implementation program. In addition, the overlay district complies with the respective subarea visions which state that commercial development will take the form of nodes and will adopt appropriate design standards to promote quality development throughout the subarea. The subarea visions also maintain that residential communities will have close proximity to jobs and commercial areas while preserving rural character.

21-7.2 **Delineation of District.** The Castleberry-Bethelview Crossroads Overlay District shall consist of those parcels within the circular boundary identified on the Official Overlay District Map of Forsyth County. Where land is classified as an overlay district, the regulations governing development in the overlay district shall apply in addition to the regulations governing development in the underlying base zoning district. In the event of an express conflict between the standards governing a base zoning district and those governing an overlay district, the standards governing the overlay district shall control.

21-7.3 **Permitted Uses.** All uses allowed in the underlying zoning districts as established by this Code, except for those listed below, are permitted in the Castleberry-Bethelview Crossroads Overlay District:

- (A) Theaters
- (B) Electronic game playing centers
- (C) Adult entertainment centers
- (D) Adult novelty stores
- (E) Pawn shops
- (F) Pool halls
- (G) Tattoo parlors

21-7.4 **Design Plan Administrative Review.** Design review shall be performed by County staff. All plans shall address and conform to all provisions set forth under Chapter 21, Article VII. Any numerical nonconformance to the standards contained within this Article shall require the submittal of a variance application in accordance with section 8-6.4 of this Code. Should a design not meet all of the non-numerical standards contained within this Article, then the proposed design must be submitted, for public hearing, to the Forsyth County Board of Commissioners for review and approval as an Alternate Design. In considering whether to approve such Alternate Design, the Board of Commissioners shall consider the Special Considerations set forth in section 8-5.5(F)(2)(b) of this Code. Architectural elevations, exterior finish schedules, and landscape plans must be submitted to the department at the time of application for a land disturbance permit. Lighting plans must be submitted prior to the issuance of a building permit. See Chapter 7 and Chapter 18 for land disturbance and building permit procedures.

21-7.5 **Site Design Standards**

- (A) **Landscaping.** The intent of this section is to require the integration of all landscape improvements with the overall project site requirements. All plant materials shall be used to enhance the existing area, particularly as viewed from an adjacent right-of-way, and to mitigate development impacts. Landscape plans shall be submitted at the time of application for a land disturbance permit to the department for design review. The following is in addition to Ordinance No. 98 (Tree Protection and Replacement Ordinance) and shall be implemented:
  1. Plant materials shall be selected to blend in form, texture, and scale with the design scheme proposed for the site.
  2. Plant materials shall be used as accent elements at roadside entryways to provide a definite sense of arrival to both commercial and residential properties. These materials shall be clustered while maintaining adequate sight distance to and from the entryway. Entryway plantings shall be compatible with landscape strip species and provide a cohesive transition between landscape plantings.
(3) All landscape design shall incorporate a minimum of 40% evergreen plantings (trees, shrubs, and groundcovers). All landscape design shall also incorporate a minimum of 50% native plant material. Such plant material must be indigenous to the Southeastern U. S. and be approved by the County arborist.

(4) Landscape Strips. Continuous plantings within 15 foot wide landscape strips along the entire property fronting a public street are required.

(5) Commercial building facades shall be landscaped with trees and tree grate protection devices or other suitable tree protection measures; method of tree protection shall be indicated on plans. Tree placement may be grouped and staggered rather than following a regulated line along the façade. Minimum installation requires 3.0 caliper inches per 50 linear feet for buildings fewer than 40,000 square feet. See 12-11.5 for installation requirements if structure is 40,000 square feet or greater.

(6) All landscape strips and landscape areas are required to contain a combination of at least two of the following elements to provide a minimum of three levels of scale: vegetative ground cover, herbaceous ornamentals, and low to mid-level shrubs in addition to large canopy trees. Trees shall count towards the tree density requirements as outlined in Ordinance No. 98 (Tree Protection and Replacement Ordinance).

(7) All parking areas shall be screened from view with evergreen shrubs. Shrubs shall be no less than three (3) feet in height as measured from the top of curb of the parking areas.

(8) Retaining walls, if necessary, must be faced with stone or brick.

(9) Equestrian-style fencing composed of vinyl and stone masonry columns shall be installed along Castleberry Road and Bethelview Road. Fence design shall conform to construction detail shown below. Stone masonry columns shall be placed fifty (50) feet on center.
(B) **Pedestrian and Bicycle Circulation.** Pedestrian connections and walkways shall be provided throughout commercial and mixed use developments.

1. Commercial buildings shall provide organized circulation for pedestrians with a clear walkway, no less than 5 feet in width, from the public sidewalk or right-of-way to main entrances of all principal buildings on the site. At a minimum, walkways shall connect focal points of pedestrian activity such as, but not limited to, street crossings, transit stops, building and store entry points.

2. All internal pedestrian walkways shall be distinguished from driving surfaces through the use of color and durable, low maintenance surface materials such as pavers, bricks, or scored concrete to enhance pedestrian safety and comfort, as well as the attractiveness of the walkways.

3. Sidewalks, no less than five (5) feet in width, shall be provided along the full length of the building along any facade featuring a customer entrance, and along any facade abutting public parking areas. Such sidewalks shall be located at least six (6) feet from the facade of the building to allow for landscaping.

4. Commercial establishments shall design drive-through facilities to minimize vehicular/pedestrian conflicts.

5. Commercial establishments shall provide bike racks, benches and/or other street furniture to encourage alternative transportation use.

21-7.6 **Architectural Design Standards.** The architectural design standards established herein apply to all development requiring a land disturbance permit. They are intended to achieve a base level of quality for architectural and landscape design that is responsive to its context and contributes to the overall character of the overlay district. The architectural criteria listed below establish minimum design standards for buildings within the overlay district in order to reduce the impacts of development on adjacent properties. The highest quality of architectural design and innovation is encouraged. These standards are in addition to the design criteria contained in Chapters 11 and 12:

(A) **Building Materials and Architectural Treatments.** The following design standards, guidelines, and enhancements are established to create a sense of architectural consistency throughout the overlay district, ensure high quality architectural design, and maintain a sense of rural character.

1. Commercial development shall adhere to an equestrian design theme through the incorporation of at least two of the following design elements: roofline features (gable vents, cupolas, weathervanes, metal pennant flags), façade details (faux or functional barn motif window and door treatments, equestrian designed wall mounts), and landscape (equestrian bollards, water feature, outdoor art installation in addition to required equestrian fencing). Design possibilities include, but are not limited to, those indicated in the photographs below and those listed in Table 21.1.

(3) Any new proposed commercial buildings shall achieve an orderly transition in scale to existing buildings on adjacent properties and in the immediate area. Building heights for non-residential developments, when adjacent to a residential use or along a street, shall have an appropriate transition or step-down of building scale to reduce and mitigate any potential adverse impacts.

![Transition of Scale](image)

(4) Commercial buildings shall be composed of brick, stone and glass with a maximum of 15% of accent material which may include stucco, exterior insulating finish system (EIFS), painted dimensioned wood or cement based material, such as Hardiplank. Exterior building material, except rear facades that do not face a public right-of-way, shall not be of pre-cast concrete, concrete masonry units, aluminum or vinyl siding, job site tilt up panels, or corrugated steel. An exterior finish schedule identifying building materials used for all building faces shall be submitted for approval with building elevations prior to design review. In addition, elevations should clearly show the location and calculate the amount/percentages of all building materials per façade.

(5) Front facades of commercial buildings shall include pedestrian-scaled architectural elements or details at the first floor level. Examples include, but are not limited to, the following:
(a) First story delineation through change of materials, colors, or fenestration; blank wall areas cannot exceed five vertical feet without delineation.
(b) canopies/awnings/trellises
(c) outdoor dining areas for restaurant establishments
(d) outdoor benches/seating area(s) for commercial retail
(e) soldier coursing or stonework integrated into the building face
(6) Commercial buildings shall include articulation of the primary entry area which shall feature no fewer than two of the following elements:
   (a) Overhangs
   (b) Canopies
   (c) recesses/projections
   (d) arcades
   (e) corniced parapets over the door
   (f) peaked roof forms
   (g) arches
   (h) display windows
   (i) integral planters or wing walls that incorporate landscaped areas and/or places for sitting

(7) Exterior facades of a free standing building located on an outparcel of a larger commercial development and/or accessory commercial structures shall be considered primary facades and shall employ architectural, site, and landscaping design elements which are integrated with and common to those used on the primary structure on the site. However, such guidelines do not apply to any facade(s) facing service courts or other areas generally not visible to the public. Common design elements shall include colors, architectural details and materials associated with the main structure or structures on the larger development.

(8) **Roof features.** Rooflines on commercial buildings shall incorporate roof features (extensions, and/or projections such as gable, hip, parapet, dormers or others) that achieve visual interest through variation along one third of the entire horizontal length of roofline. These features shall conform to the following specifications where applicable:
   (a) Roof features shall not exceed the average height of the supporting walls.
   (b) The average height of parapets shall not exceed 15% of the height of the supporting wall and shall not at any point exceed one-third of the height of the supporting wall. Parapets shall feature three dimensional cornice treatments.
   (c) The roof pitch of sloped roofs shall be a minimum of 4:12.
   (d) Roof styles for multi-building complexes shall be compatible and consistent with roof designs for the entire complex.
   (e) Appropriately sized and designed gable vents, cupolas and/or weathervanes in keeping with an equestrian motif, shall be incorporated into the roofline. Illustrative examples are shown in the following photographs:

(9) Color shades shall be used to unify and integrate the overall development project. Colors on commercial residential buildings shall be of low reflectance, subtle, neutral or earth tone colors. See Table 21.2 for a pre-approved color palette for commercial buildings. Building trim may feature accent colors, subject to approval by staff. If natural brick is used, it shall not be painted.

(10) Material and/or color changes on commercial buildings generally shall occur at a change of plane. Piecemeal embellishment and frequent changes in material shall be avoided.

(11) New residential development shall use a variety of techniques to avoid the monotonous appearance of identical homes. Such techniques may employ among others, the use of differing front elevations, architectural styles, building exteriors or other techniques to provide a more pleasing appearance to the subdivision. No vinyl or aluminum siding shall be allowed.

(12) New residential development shall respect the scale and character of adjacent residential neighborhoods through attention to views, building scale and orientation, proximity to adjacent uses, location of driveways, noise, lighting and landscape.

(B) **Exterior Lighting.** All lighting shall be designed to integrate with the overall development character. A lighting plan is required to be submitted at the time of application for a building permit that addresses
and conforms to all provisions set forth in this section. The lighting plan shall address fixture design and location. In addition to 16-4.20, the following shall apply:

1. Lighting shall be architecturally integrated with the style, material, and color of on-site structures.

2. Mounting heights and shielding shall be utilized to effectively control glare and light trespass. Light fixtures over 14’ in height shall be full cutoff fixtures. Pedestrian light fixtures 14’ in height or less may be cutoff or semi-cutoff fixtures. See 16-4.20 for light spillage and height regulations.

3. Lighting shall not blink, flash, or oscillate.

4. All outside illumination of any building and/or surrounding landscape, except for security purposes, is prohibited after 11:00 P.M. or when the business closes, whichever is later.

5. All lighting fixtures on a project site shall be from the same family of fixtures with respect to design, materials, finish, color, and color of light and shall complement the architectural theme and materials established by the primary buildings. Compatibility of fixture styles shall be approved by staff.

6. Architectural lighting of building facades: Building illumination and architectural lighting shall be indirect in character and shall respect and reinforce the architectural treatment of the building.
   a. Upward aimed building façade lighting shall not exceed 900 lumens and shall not require shields. All upward aimed lights shall be fully confined from projecting into the sky by eaves, roofs, or overhangs.
   b. Building façade lighting exceeding 900 lumens shall be shielded, aimed downward, and shall be mounted as flush to a wall as possible.
   c. All lighting shall be fully contained within the vertical surface of the wall being illuminated.
   d. Highly polished surfaces such as glass, marble, glazed tile, glazed brick, porcelain Enamel, and highly reflective metals shall not be lighted directly to minimize reflective glare.

7. Swivel-mounted luminaries and wall packs are prohibited.

8. Landscape lighting shall only be utilized to accent landscaping, be pointed away from the property line, and fixtures shall contain extension shields to minimize glare and light source visibility.

(C) Screening. In addition to regulations set for in Chapter 12, the following standards shall apply to commercial development:

1. All ground mounted mechanical, HVAC, electric and communications transformers and like systems shall be screened from view from any public right-of-way and any residential use by one of the following: placement behind the building, 100% opaque fencing, an earthen berm, and/or a vegetative screen planted according to County buffer standards.

2. Flat roofs, roof mounted equipment and other accessories shall be screened from public view by a parapet, gable roof, roof screen, or architectural feature. Roof equipment and roof screens shall be finished to match the roof or parapet wall.

3. Loading areas shall be screened from the public right-of-way and any residential use by placement behind the main building, an earthen berm and/or vegetative screen planted according to County buffer standards.

4. Drive-thru facilities and stacking lanes, when contiguous to any public right-of-way, residential use, or pedestrian gathering area shall be obscured from view by placement behind the building, an earthen berm and/or vegetative screen planted according to County buffer standards.

5. All parking areas shall be screened from view with evergreen shrubs. Shrub height shall be no less than three (3) feet as measured from the top of curb of the parking areas.

6. Outside storage is prohibited, except for seasonal sales of holiday trees, nursery supplies, and pumpkins. In no instance shall outdoor display obstruct sidewalks or otherwise impede pedestrian movement to the establishment’s entrance.

7. Storage of shopping carts shall be indoors and/or located adjacent to the building where the carts are utilized. Storage/enclosure shall be made out of masonry to match the exterior building materials. Parking lot corrals are allowed.
(8) Chain link or coated chain link fence is prohibited along road frontage for Castleberry Road and Bethelview Road. If fences are not located along road frontage, but are visible from the right of way, fences must be screened by vegetation for their full length and height.

21-7.7 **Signage.** This section establishes minimum standards to promote and ensure a cohesive and unified identification program within the overlay district. A detailed signage plan is required to be submitted that addresses and conforms to all provisions set forth in this section. The signage plan shall address sign dimensions, color scheme, lighting, location of each sign on the building and on the ground, materials, and height. In addition to Ordinance No. 74 (Sign Ordinance), the following shall apply:

(A) All sign designs shall conform to established color guidelines and complement the architecture of the building and site plan in terms of size, shape, color, texture, and lighting.
(B) The architectural color standards of the district apply only to the sign structure not to the sign face.
(C) The size and shape of a sign shall be proportionate with the scale of the structure.
(D) Wall signs shall be flush against the wall, not cover architectural features or details, and not extend beyond the roof line or outer edges of the building.
(E) Where there is more than one sign on a site, signs shall be complementary to each other in shape and have related components and type of construction materials.
(F) Monument signs shall match the principal building material(s).
(G) Any exterior light source shall be completely shielded and directed solely on the sign and not upon any other object or adjacent properties.
(H) Signage shall not have illuminating devices that have a changing light intensity, brightness, or color.

21-7.8 **Miscellaneous Provisions**

(A) No commercial use shall be designated or operated so as to expose residents to offensive odors, dust, electrical interference, and/or vibration.
(B) Outdoor seating areas play equipment, and perimeter fencing shall be of compatible and attractive design that is integrated with the main building architecture.
(C) Amenities such as kiosks, water fountains, and public telephones are encouraged. Outdoor art installations may also be provided in the open spaces, plazas, and along streetscapes to provide visual interest and diversity. The following are illustrative examples of equestrian art and fountain installations that could be adapted for the overlay district:
ARTICLE VIII, PEACHTREE PARKWAY-BETHELVIEW ROAD OVERLAY DISTRICT:

21-8.1 Purpose. The purpose of this overlay district is to establish minimum standards for non-residential site development, exterior architectural design, landscaping, lighting and signage that contribute to the district’s overall character. This is accomplished through enhancement of commercial growth through unity of design and quality architecture and the creation of visual interest through landscape and architectural features. Design standards are intended to ensure coordinated design of building exteriors in order to promote visual congruence, positively impact adjacent properties, and produce buildings that augment the character and appearance of the area. It is the goal of this ordinance to promote freedom in design while establishing a baseline for design compatibility. This goal is in accordance with the County’s objective to encourage landscaping, signage, building design, and other development regulations that enhance the image of the County and create value as stated in the implementation program of the Comprehensive Plan. In addition, the overlay district complies with the respective subarea visions which state that the vicinity will be the site of quality development and business opportunities. The subarea visions also maintain that the area will be known to have grown in a responsible manner, offering residents a high quality of life as well as opportunities for employment, shopping, and recreation.

21-8.2 Delineation of District. The Peachtree Parkway/Bethelview Road Overlay District applies to all properties indicated on the Official Overlay District Map of Forsyth County. Regulations pertain to parcels or portions of parcels that fall within 1,000 feet of the centerline of Peachtree Parkway/Highway 141/Bethelview Road (from Highway 141) to the intersection with Kelly Mill Road with the exception of parcels within the Castleberry-Bethelview Crossroads Overlay District. If a portion of a parcel extends beyond the boundary of the overlay district, overlay regulations may extend to the remaining portion of the parcel(s) at the option of the property owner. Where land is classified as an overlay district, the regulations governing development in the overlay district shall apply in addition to the regulations governing development in the underlying base zoning district. In the event of an express conflict between the standards governing a base zoning district and those governing an overlay district, the standards governing the overlay district shall control.

21-8.3 Permitted Uses. All uses allowed in the underlying zoning districts as established by this Code are permitted in the Peachtree Parkway/Bethelview Road Overlay District.

21-8.4 Design Plan Administrative Review. Design review shall be performed by staff. All plans shall address and conform to all provisions set forth under Chapter 21, Article VIII. Any numerical nonconformance to the standards contained within this Article shall require the submission of a variance application in accordance with section 8-6.4 of this Code. Should a design not meet all of the non-numerical standards contained within this Article, then the proposed design must be submitted, for public hearing, to the Forsyth County Board of Commissioners for review and approval as an Alternate Design. In considering whether to approve such Alternate Design, the Board of Commissioners shall consider the Special Considerations set forth in section 8-5.5(F)(2)(b) of this Code. Architectural elevations, exterior finish schedules, landscape, and signage plans must be submitted to the department at the time of application for a land disturbance permit. Lighting plans must be submitted prior to the issuance of a building permit. See Chapter 7 and Chapter 18 for land disturbance and building permit procedures.

21-8.5 Site Design Standards.

(A) Parking for commercial establishments shall be distributed along not less than two sides of the building exterior. Parking that fronts the main building entrance(s) shall not exceed sixty (60) percent of parking total or three hundred (300) parking spaces, whichever is less.

(B) New commercial developments and substantial improvements to existing commercial developments shall provide for pedestrian and automobile access connections between adjacent commercial properties.

(C) Speed bumps are prohibited within commercial developments. Speed tables are permitted.

(D) Landscaping. The intent of this section is to require the integration of all landscape improvements with the overall project site requirements. All plant materials shall be used to enhance the existing area, particularly as viewed from an adjacent right-of-way, and to mitigate development impacts. Landscape plans shall be submitted to the department for design review. The following is in addition to Ordinance No. 98 (Tree Protection and Replacement Ordinance) and shall be implemented:

(1) Plant materials shall be used as accent elements at roadside entryways to provide a definite sense of arrival to commercial properties. Plant materials shall consist of ground cover, herbaceous ornamentals, shrubs, understory, and/or overstory trees adjacent to the establishment’s monument sign(s). These materials shall be clustered while maintaining adequate sight distance to and from the entryway. Entryway plantings shall be compatible with adjacent landscape areas in species selection and provide a cohesive transition between landscape plantings.
Chapter 21, Overlay Districts
Unified Development Code of Forsyth County

21-8.6 Architectural Design Standards. The architectural design standards established herein apply to all commercial development requiring a land disturbance permit. They are intended to achieve a base level of quality for architectural and landscape design that is responsive to its context and contributes to the overall character of the overlay district. The architectural criteria listed below establish minimum design standards for buildings within the overlay district in order to reduce the impacts of commercial development on adjacent properties. The highest quality of architectural design and innovation is encouraged. These standards are in addition to the design criteria contained in Chapters 11 and 12.

(2) All landscape areas shall provide a design of appropriate character and shall incorporate a minimum of forty (40%) percent evergreen trees and shrubs. All landscape areas shall also incorporate a minimum of twenty-five (25%) percent native plant material. Such plant material must be indigenous to the Southeastern U. S. and be approved by the County arborist.

(3) A minimum twenty-five (25) foot wide landscape strip shall be provided along the proposed future rights-of-way and reservation lines of Georgia Highway 141/Peachtree Parkway/Bethelview Road.

(4) All landscape strips are required to contain a combination of at least two (2) of the following elements to provide a minimum of three levels of scale: vegetative ground cover, herbaceous ornamentals, and low to mid-level shrubs in addition to a combination of large canopy trees. All proposed shrubs should be a minimum of three (3) gallon size and two (2) feet high at time of planting spaced every five (5) feet on center. Strips must also include large canopy trees with total caliper measurements equivalent to a minimum of six (6) caliper inches per fifty (50) linear feet with a minimum two (2) inch caliper and eight (8) foot height required at time of installation for each tree. Tree placement may be grouped and staggered rather than following a regulated line along the road frontage. Trees shall count towards the tree density requirements as outlined in Ordinance 98 (Tree Protection and Replacement Ordinance).

(5) A minimum of ten (10) feet of the required twenty-five (25) foot landscape strip shall be located behind utility easements so plant material will not be disturbed after installment.

(6) All parking areas shall be screened from view with evergreen shrubs. Shrubs shall be no less than three (3) feet in height as measured from the top of curb of the parking areas. Exemption to this requirement may be requested when the site is significantly below road grade level.

(7) Landscape Installment and Maintenance. Certification by a registered landscape architect verifying that landscaping meets the standards of this code and the approved plans must be submitted. In addition, the contractor responsible for landscape installation must certify that all plant material has been installed per the approved plans. These certifications must be submitted prior to the approval of the as-built and/or final plat.

(8) All dead and damaged plant material within landscaped areas must be replaced with a similar species within one month. If weather conditions are not appropriate for replanting, the property owner may postpone replacement for up to six (6) months. Replacement trees and shrubs shall be of similar size to trees or shrubs being replaced.

(9) Performance Security. When planting stock availability is low or weather conditions are not appropriate for planting new trees, shrubs, and/or perennials, the property owner may postpone planting for up to six (6) months, provided that performance security is posted with Forsyth County in accordance with the following criteria:

(a) Security shall be in an approved form submitted to the department with appropriate documentation of stock availability and weather conditions.

(b) Security shall be in an amount equal to 110 percent of the cost of materials, installation, and guarantee, as demonstrated by a signed contract between the owner and a landscape contractor. An inspection shall be made of all plantings to assure compliance with plan requirements prior to release of performance security. Forsyth County will use the performance security at the time of expiration if the planting requirements have not been fulfilled, or if the owner has not requested an extension. Funds received from the performance security will be used to bring the project into compliance. One six (6) month extension is permitted with documented justification. Any inspections performed after the final inspection for project release are subject to re-inspection fee schedules, which shall be maintained on file at the department.

(10) Retaining walls, if necessary, must be faced with brick, stone, cast stone or split face modular block if visible from the right-of-way.
(A) **Building Materials and Architectural Treatments.** The following design standards, guidelines, and enhancements are established to create a sense of architectural consistency throughout the overlay district and to ensure high quality architectural design.

1. Exterior building materials on all commercial development shall consist of a minimum of seventy-five (75) percent per vertical wall plane of brick, natural or pre-cast stone, and/or glass. If multiple establishments are contained within one contiguous structure, the percentage pertains to the entire façade rather than individual façade fronts.

2. Accent wall materials on all commercial development shall not exceed twenty-five (25) percent per vertical wall plane. Accent building materials include, but are not limited to, exterior finish insulation systems, stucco, and painted dimension wood. If multiple establishments are contained within one contiguous structure, the percentage pertains to the entire façade rather than individual façade fronts. Smooth, split face and/or rib faced concrete masonry units, aluminum siding, vinyl siding, and corrugated steel are prohibited.

3. The principle entry area of a building, or if in a shopping center the largest tenant or a central location of a group of buildings, shall be articulated and should express greater architectural detail than other portions of the building. Entries shall include at least one of the following or similar architectural elements:
   - (a) Overhangs
   - (b) Canopies
   - (c) recesses/projections
   - (d) columns
   - (e) arcades
   - (f) corniced parapets over the door
   - (g) peaked roof forms
   - (h) arches
   - (i) display windows
   - (j) integral planters or wing walls that incorporate landscaped areas and/or places for sitting

4. Freestanding accessory structures shall have architectural detailing and design elements consistent with the primary buildings of the development complex to provide a cohesive design.

5. **Roof features.** Rooflines on commercial buildings shall incorporate roof features (extensions, and/or projections such as gable, hip, parapet, dormers or others) that achieve visual interest through variation along one third of the entire horizontal length of roofline. These features shall conform to the following specifications where applicable:
   - (a) The roof pitch of sloped roofs shall be a minimum of 4:12.
   - (b) Roof styles for multi-building complexes shall be compatible and consistent with roof designs for the entire complex.

6. Burglar bars, fiberglass awnings, and steel-roll down curtains are prohibited except at the structure’s rear. Burglar bars are prohibited on the rear if visible from a public street. Burglar bars are also prohibited on the rear of an outparcel building if visible from the main structure.

(B) **Color.** All exterior painted surfaces on commercial structures visible from the right-of-way shall be painted in neutrals and earth tones. Neutrals refer to blacks, whites, beiges or grays while earth tones refer to browns, umbers, sienna, terracotta and brick tones. Fluorescent colors and those bright in intensity are prohibited. Glass, metal, natural stones, and sign faces are excluded from the color requirements.

(C) **Exterior Lighting.** All lighting for commercial development shall be designed to integrate with the overall development character.

1. Lighting shall be architecturally integrated with the style, material, and color of on-site structures.

2. Lighting shall be unobtrusive and refrain from adverse impact of adjacent properties and public right-of-ways. See 16-4.20 for fixture type, light spillage, and height regulations.

3. Exposed neon and fluorescent lighting is not permitted except for open and closed signs.

4. For drive-under canopies and pump islands, the luminaries shall be recessed into the canopy ceiling so that the bottom of the luminaries does not extend below the ceiling.

5. Promotional beacons, search lights, laser source lights, strobe lights or any similar light when projected above the horizon, and lighting used for causing sky glow to attract attention in excess of the lighting used to provide safety, security and utility are prohibited. Projects that want to integrate lines or rows of lights within a defined pedestrian plaza may seek administrative approval upon
submission of lighting specifications. Such lights shall not be placed permanently on building exteriors.

(6) Pedestrian street lights, not to exceed fourteen (14) feet in height, shall be installed along SR 141/Peachtree Parkway from Majors Road to SR 9/Atlanta Highway per GDOT approved lighting plan.

(D) **Screening.** In addition to regulations set forth in Chapter 12, the following standards shall apply:

(1) Accessory site features including, but not limited to, meters, meter boxes, electrical transformers, and other equipment located on the ground shall be screened from view from public rights-of-way, residential uses, or any residential or agricultural zoning category by placement behind the main building, 100% opaque fencing, berm and/or a vegetative screen planted according to County buffer standards.

(2) Flat roofs, roof mounted equipment and other accessories shall be screened from view from the public rights-of-way, residential uses or any residential or agricultural zoning category by a parapet, gable roof, roof screen, or other architectural feature. Roof equipment and roof screens shall be finished to match the roof or parapet wall. When the relationship between building roofs and adjoining public streets and/or residential developments make screening of roof equipment impossible (e.g. road higher than roof), a parapet of no less than four feet in height shall be installed.

(3) Loading areas shall be screened from the public rights-of-way, residential uses, or any residential or agricultural zoning category by placement behind the main building or appropriately scaled wall, the use of earthen berms that are no less than 5 feet in height and/or a vegetative screen planted according to County buffer standards.

(4) Drive-thru facilities and stacking lanes, when contiguous to any public right-of-way, residential use, or pedestrian gathering area shall be obscured from view by an earthen berm and/or a vegetative screen planted according to County buffer standards.

(5) Storage of shopping carts shall be located adjacent to the building where the carts are utilized. Storage/enclosure shall be made out of masonry to match the exterior building materials. Parking lot corrals are allowed.

(6) Walls or fences, required or otherwise, when visible from the right-of-way shall complement the exterior materials of the primary structure on site. Tarps and banner signs shall not be attached to fencing material.

(7) Chain link fencing is prohibited on SR 141/Peachtree Parkway/Bethelview Road frontage. Chain link fencing may be allowed along the sides and rear of property fronting SR 141/Peachtree Parkway/Bethelview Road if it is screened with evergreen trees, shrubs, and/or decorative fencing for the full length and height of the fence.

**21-8.7 Signage.** This section establishes minimum standards to promote and ensure a cohesive and unified identification program within the overlay district. A detailed signage plan is required to be submitted that addresses and conforms to all provisions set forth in this section. The signage plan shall address sign dimensions, materials, height, color scheme, lighting, and location of each sign on the building and on the ground. In addition to Ordinance 74 (Sign Ordinance), the following shall apply:

(A) Freestanding sign structure/base materials shall match the principal building material.

(B) Wall signs shall not cover architectural features or details, and not extend beyond the roof line or outer edges of the building.

(C) Where there is more than one sign on a site; signs shall be complementary to each other in shape and related components and type of construction materials.

(D) Any exterior light source shall be completely shielded and directed solely on the sign and not upon any other object or adjacent properties.

(E) Wall mounted raceways shall be painted to match the adjoining wall surface.
ARTICLE IX, RONALD REAGAN/UNION HILL OVERLAY DISTRICT

21-9.1 Purpose. The purpose and intent of the Forsyth County Board of Commissioners (the “Commission”) in establishing this overlay district is as follows:

(A) To support flexibility and innovation for regional mixed-use developments encompassing more than 150 acres of land through the complementary integration of office, retail, restaurants, commercial, entertainment, hotel, residential and recreational land uses.

(B) To encourage pedestrian circulation, integrate open space, and create a regional retail and mixed-use development.

(C) To enhance the long term economic viability of the southern portion of Forsyth County by encouraging regional retail and mixed-use development that increases the tax base and generates a substantial employment base;

(D) To foster a more balanced relationship between commercial and residential growth to ensure a stable and healthy tax base in Forsyth County, and

(E) To encourage an efficient and sustainable community development plan.

21-9.2 Boundaries and Description of Area. The boundaries of the approximate 164-acre Ronald Reagan/Union Hill Overlay District (the “Overlay”) shall be as shown on the Official Overlay District Map of Forsyth County, as established and adopted pursuant to Section 9-1.4 of the Forsyth County Unified Development Code (the “UDC”). All property within the Overlay shall be developed simultaneously or in phases in accordance with this Article and generally in accordance with the master development plan for the Overlay attached hereto and incorporated herein by reference (the “Plan”). The Plan is intended to provide a conceptual context in which property within the Overlay may be developed in accordance with this Article. The reassignment of land uses for buildings depicted on the Plan shall not require a formal plan amendment unless such land use reassignment constitutes a major plan amendment, as set forth in Section 21-9.10 of this Article. Approval of a sketch plat, as set forth in Chapter 8, Article V of the UDC, or any other similar site plan approval shall not be required for new development within the Overlay.

21-9.3 Relationship to Underlying Zoning and Other Regulations. The provisions of this Article are supplemental to the zoning district in which the property is located. All properties within the boundaries of the Overlay shall meet the development requirements of the underlying CBD zoning district, or other zoning district if the CBD zoning district is changed for the property, or zoning conditions specific to the property or as such may be amended, and in addition shall meet all of the provisions of this Article. The provisions of this Article shall be the only overlay provisions applicable within the boundaries of the Overlay. In the event of a conflict or inconsistency between the provisions of this Article and any other provision of the UDC, applicable conditional use permits, the Forsyth County Tree Protection and Replacement Ordinance (the “Tree Ordinance”), the Forsyth County Sign Ordinance (the “Sign Ordinance”) or applicable site-specific zoning conditions, this Article shall govern the development of the property within the boundaries of the Overlay.

21-9.4 Sub-Area 1 (Regional Mixed-Use). This sub-area is intended to provide a high density, regionally-marketed retail and mixed-use development as identified on the Plan.

(A) Permitted Uses

(1) All uses permitted under CBD (Commercial Business District) zoning, subject to Section 21-9.8(O) of this Article.

(2) Multi-family dwelling units, not to exceed 400 units, subject to the aggregate residential density restrictions set forth in section 21-9.8 of this Article. Each unit shall contain a minimum heated floor space of 900 square feet, except the one-bedroom units shall contain a minimum heated floor space of 600 square feet.

(3) Ground level retail trade establishments in multi-story buildings otherwise occupied by residential or office uses.

(B) Building Height Limits

(1) Buildings containing office, hotel and/or residential uses may also include parking uses and shall be limited to a maximum of twelve (12) occupiable stories, not to exceed a maximum height of 180 feet.

(2) Parking decks shall be limited to a maximum height of eight (8) levels.

(C) Buffers and Setbacks

(1) Setback and Visual Buffer from Georgia Highway 400. A minimum setback of sixty (60) feet from the right-of-way from Georgia Highway 400 must be maintained with the first forty (40) feet being a visual buffer. Grading, drainage, and tree plantings may be performed within the visual buffer as long as the disturbed area is replanted to Forsyth County Buffer Standards.
(2) Minimum landscape strips and frontage planting strips required by the UDC shall not be required along or adjacent to property lines or lease lines. Landscape strips and frontage planting strips shall not be required along any property line or lease line where existing or proposed buildings are, or will be, constructed directly abutting both sides of a common property line or lease line. The purpose of this provision is to allow for a continuous building façade across property lines that would otherwise be interrupted by a landscape strip.

(3) Minimum setbacks required by the UDC shall not be required along or adjacent to property lines or lease lines. Setbacks shall not be required along any property line or lease line where existing or proposed buildings are, or will be, constructed directly abutting both sides of a common property line or lease line. The purpose of this provision is to allow for a continuous building façade across property lines that would otherwise be interrupted by a setback.

21-9.5 Sub-Area 2 (Village Commercial and Mixed-Use). This sub-area is intended to provide for a mix of community scale uses that may include office, hotel, commercial, retail, drug store, bank, restaurant, residential, and recreational land uses as identified on the Plan.

(A) Permitted Uses

(1) All uses permitted under CBD (Commercial Business District) zoning, subject to Section 21-9.8(O) of this Article.

(2) Ground level retail trade establishments in multi-story buildings otherwise occupied by residential or office uses.

(3) Multi-family dwelling units, not to exceed 300 units, subject to the aggregate residential density restrictions set forth in section 21-9.8 of this Article. Each unit shall contain a minimum heated floor space of 900 square feet, except the one-bedroom units shall contain a minimum heated floor space of 600 square feet.

(B) Building Height Limits

(1) Hotels on parcels located within 600 feet of Union Hill Road shall be limited to a maximum height of eight (8) occupiable stories, not to exceed a maximum height of 130 feet. All other buildings may include parking facilities and shall be limited to a maximum of six (6) occupiable stories, not to exceed a maximum height above grade of 90 feet, exclusive of any integrated parking levels.

(2) Parking decks shall be limited to a maximum height of four (4) levels.

21-9.6 Sub-Area 3 (Residential with Limited Commercial). This sub-area is intended to maximize the diversity of housing choices within the Overlay by providing a more traditional multi-family residential community node with limited commercial to include retail, bank, drug store, restaurant, and/or office uses, as indented on the Plan.

(A) Permitted Uses

(1) All uses permitted under CBD (Commercial Business District) zoning, subject to Section 21-9.8(O) of this Article.

(2) Multi-family dwelling units, not to exceed 375 units, subject to the aggregate residential density restrictions set forth in section 21-9.8 of this Article. Each unit shall contain a minimum heated floor space of 900 square feet, except the one-bedroom units shall contain a minimum heated floor space of 600 square feet.

21-9.7 Architectural Design Standards. The architectural design standards established herein apply to all commercial development requiring a land disturbance permit. They are intended to achieve a base level of quality for architectural and landscape design that is responsive to its context and contributes to the overall character of the overlay district. The architectural criteria listed below establish minimum design standards for buildings within the overlay district in order to reduce the impacts of commercial development on adjacent properties. The highest quality of architectural design and innovation is encouraged. These standards replace the design criteria contained in UDC Chapters 11 and 12.

(A) Facades and Exterior Walls.

(1) Front facades greater than one hundred (100) feet in length, measured horizontally, shall incorporate wall plane projections or recesses having a depth of at least two (2) percent of the length of the facade. No uninterrupted length of any facade shall exceed two hundred (200) horizontal feet.

(2) Minimum Wall Articulation. Front facade design shall provide varying wall offsets and other architectural features to create horizontal (wall) and vertical building articulation. Along with the wall plane requirements in (1) above, at least one of the following treatments shall be incorporated:

(a) Change in texture or color.

(b) Change in pattern or material.
Building Materials and Architectural Treatments. The following design standards, guidelines, and enhancements are established to create a sense of architectural consistency throughout the overlay district and to ensure high quality architectural design.

1. Exterior building materials on all commercial development shall consist of a minimum of twenty-five (25) percent per vertical wall plane of brick, natural or a decorative masonry unit pre-cast stone, and/or glass. If multiple establishments are contained within one contiguous structure, the percentage pertains to the entire facade rather than individual facade fronts.

2. Accent wall materials on all commercial development shall not exceed seventy-five (75) percent per vertical wall plane. Accent building materials include, but are not limited to, exterior finish insulation systems, stucco, and painted dimension wood. If multiple establishments are contained within one contiguous structure, the percentage pertains to the entire facade rather than individual facade fronts. Smooth and/or rib faced concrete masonry units, aluminum siding, vinyl siding, and corrugated steel are prohibited.

3. The principle entry area of a building, or if in a shopping center the mall entrances, shall be articulated and should express greater architectural detail than other portions of the building. Entries shall include at least one of the following or similar architectural elements:
   a. Overhangs
   b. Canopies
   c. Recesses/projections
   d. Columns
   e. Arcades
   f. Corniced parapets over the door
   g. Peaked roof forms
   h. Arches
   i. Glass entry
   j. Integral planters or wing walls that incorporate landscaped areas and/or places for sitting

4. Freestanding accessory structures shall have architectural detailing and design elements consistent with the primary buildings of the development complex to provide a cohesive design.

5. Burglar bars, fiberglass awnings, and steel-roll down curtains are prohibited except at the structure’s rear. Burglar bars are prohibited on the rear if visible from a public street. Burglar bars are also prohibited on the rear of an outparcel building if visible from the main structure.

Color. All exterior painted surfaces on commercial structures visible from the public right-of-way shall be painted in neutrals and earth tones. Neutrals refer to blacks, whites, beiges or grays while earth tones refer to browns, umbers, sienna, terracotta and brick tones. Fluorescent colors and those bright in intensity are prohibited. Glass, metal, natural stones, and sign faces are excluded from the color requirements.

Exterior Lighting. All lighting for commercial development shall be designed to integrate with the overall development character. Parking lot lighting shall be no more than thirty-five (35) feet in height.

1. Lighting shall be architecturally integrated with neutral or earth tone colors.

2. Lighting shall be unobtrusive and refrain from adverse impact of adjacent properties outside of the overlay district and public right-of-ways. See UDC 16-4.20 for fixture type and light spillage.

3. Exposed neon and fluorescent lighting is not permitted except for open and closed signs.

4. For drive-under canopies, the luminaries shall be recessed into the canopy ceiling so that the bottom of the luminaries does not extend below the ceiling.

5. Promotional beacons, search lights, laser source lights, strobe lights or any similar light when projected above the horizon, and lighting used for causing sky glow to attract attention in excess of the lighting used to provide safety, security and utility are prohibited. Projects that want to integrate lines or rows of lights within a defined pedestrian plaza may seek administrative approval upon submission of lighting specifications. Such lights shall not be placed permanently on building exteriors.

Screening. The following standards shall apply:

1. Accessory site features including, but not limited to, meters, meter boxes, electrical transformers, and other equipment located on the ground shall be screened from view from public rights-of-way or residential uses by placement behind the main building. 60% opaque fencing, berm and/or a vegetative screen planted according to County buffer standards.
21. Flat roofs, roof mounted equipment and other accessories shall be screened from view from the public rights-of-way or residential uses by a parapet, gable roof, roof screen, or other architectural feature. Roof equipment and roof screens shall be finished to match the roof or parapet wall. When the relationship between building roofs and adjoining public streets and/or residential developments make screening of roof equipment impossible (e.g. road higher than roof), a parapet of no less than four feet in height shall be installed.

3. Loading areas shall be screened from the public rights-of-way or residential uses by placement behind the main building or appropriately scaled wall or the use of landscape buffer that is no less than 5 feet in height.

4. Walls or fences, required or otherwise, when visible from the public right-of-way shall complement the exterior materials of the primary structure on site. Tarps and banner signs shall not be attached to fencing material.

5. Chain link fencing is prohibited on Ronald Reagan Boulevard and Union Hill Road frontage. Chain link fencing may be allowed along the sides and rear of property fronting Ronald Reagan Boulevard if it is screened with evergreen trees, shrubs, and/or decorative fencing for the full length and height of the fence.

F. Exemptions. The director may exempt all or parts of the design standards in this section for commissioned buildings by an architect for a site when the design constitutes a unique, one of a kind building that meets or exceeds the intent of these design standards, as demonstrated by architectural elevations.

21.9.8 General Regulations

A. At least fifteen percent (15%) of the area within the Overlay, exclusive of public roads, public rights-of-way, and inter-parcel access easements, shall be set aside as open space.

B. The following elements may be included in the calculations of open space within the Overlay:

1. Any combination of primary and secondary conservation areas that together form a permanent, undivided or relatively undivided, undeveloped area.

2. All buffers, setbacks and other areas not containing any buildings or pavements.

3. Plazas, fountains, squares and other similar pedestrian amenities.

4. Wetlands, creeks, streams and tributaries, drainage areas, detention ponds, and floodplain.

5. Areas within multi-family residential developments designed and intended for the use and enjoyment of all residents or the use and enjoyment of the public.

C. Calculation of Minimum Parking and Loading Spaces

1. All minimum parking and loading requirements for retail uses based on building floor area shall be calculated using Gross Leasable Area, as hereinafter defined.

2. One off-street loading space shall be provided for the first 5,000 square feet of Gross Leasable Area or fractional part thereof for retail uses for which a loading space is required. One additional space shall be required for each additional 75,000 square feet of Gross Leasable Area or fractional part thereof for retail uses.

3. All minimum parking and loading requirements for office uses based on building floor area shall be calculated using Gross Building Area, as hereinafter defined.

4. One off-street loading space shall be provided for the first 5,000 square feet of Gross Building Area or fractional part thereof for office uses for which a loading space is required. One additional space shall be required for each additional 100,000 square feet of Gross Building Area or fractional part thereof for office uses.

5. Unless otherwise approved by the director, loading spaces shall be a minimum of ten (10) feet wide, thirty (30) feet long, with fourteen (14) feet of height clearance.

6. Shared parking may be provided at 3.5 spaces per 1,000 square feet of Gross Leasable Area or Gross Building Area, for retail or office uses, respectfully, as hereinafter defined, for any combination of different office and retail land uses within the Overlay (or any sub-area thereof) when such parking arrangement is supported by:

(a) Documentation from an acceptable industry publication (e.g., Institute of Transportation Engineers, Urban Land Institute, American Planning Association, etc.); or

(b) A study prepared by a traffic engineering firm that documents parking requirements and supports the use of shared parking.
(D) **Surface Parking Standards**

1. Any parking area exceeding twenty-five (25) spaces shall provide a minimum of ten percent (10%) of the total parking area as landscape islands. Landscape strips located between a parking area and a private street, driveway or public road shall count toward meeting this requirement.

2. At minimum, landscape islands shall be located at the end of every other Parking Bay and, on average, every 150 linear feet of continuous parking space width.

3. Landscape islands for single parking bays shall contain a minimum of 150 square feet. Landscape islands for double parking bays shall require a minimum of 150-square-foot islands on each side or one continuous landscape island of 300 square feet on one side.

4. Each parking landscape area shall contain turf grasses, shrubs, trees, or other landscape material in any combination, but must consist of at least two plant types. Landscape islands shall be located to effectively avoid large expanses of paving and contribute to orderly circulation of vehicular and pedestrian traffic.

5. All trees planted in landscape islands and landscape areas shall be a minimum of three and one-half inches in caliper measured 36 inches above ground, shall be a minimum of ten feet in height, and shall be drought tolerant.

(E) **Physical Relationships Between Buildings and Uses.**

1. Buffers shall not be required between non-residential uses (including multi-family residential uses) and single-family or multi-family residential uses internal or external to the Overlay.

2. Minimum setbacks or other spatial separations required by the UDC shall not be required between buildings within the boundaries of the Overlay.

3. Minimum setbacks shall be 10 feet from a public road.

4. Minimum setbacks shall be 10 feet from common property lines shared with abutting properties that are zoned for residential development, which are outside of the boundaries of the Overlay with the exception of Sub-Area 3 in which the minimum building setbacks shall be 20 feet.

5. Setbacks shall not be required from private streets or driveways.

6. Condominium developments and townhouse developments may be located on public roads or private streets. The developer shall build private streets to Forsyth County standards. Private streets built to county standards may be dedicated to the public at the developer’s option.

(F) **Residential Density**

1. Residential density within the Overlay shall not be calculated on a per acre basis. Notwithstanding any other provisions within this Article, residential development within the Overlay shall not exceed an aggregate total of 875 dwelling units.

2. Buildings containing condominiums or apartments may include more than six (6) residential units.

(G) **Tree Replacement**

1. To be consistent with section 2.11 of the Tree Ordinance, because the Plan exceeds the floor area threshold for Developments of Regional Impact:
   
   a. Eighteen (18) tree units per acre shall be provided within the Overlay;
   
   b. Developers shall not be required to replace Specimen Trees (as defined in the Tree Ordinance) that are removed during the initial development of a parcel within the Overlay.

2. Calculations of tree units provided per acre shall include Specimen Trees, and non-specimen trees with a diameter at breast height of at least 18 inches, that are planted or preserved within the Overlay, including those within required buffers or open spaces.

3. In order to provide sufficient growing area for planted trees, a minimum of 300 square feet of pervious root zone shall be provided for every large tree.

(H) **Stream Buffers**

1. Unless a stream buffer encroachment is approved by the State of Georgia Environmental Protection Division and Forsyth County, a natural vegetative buffer shall be maintained for 50 feet, measured horizontally, on both banks (as applicable) of State waters as measured from the top of bank. With the exception of new tree plantings, this 50-foot vegetative buffer shall remain undisturbed.

2. Unless a stream buffer encroachment is approved by the State of Georgia Environmental Protection Division and Forsyth County, an additional setback shall be maintained for an average of 30 feet, measured horizontally, beyond the undisturbed natural vegetative buffer. Land disturbance activities, including but not limited to grading, drainage, retaining walls, utilities, pervious trails,
tree planting and landscaping shall be allowed within this additional setback so long as any disturbed area is stabilized. Stormwater shall not be discharged across any portion of the additional stream buffer setback with a width of less than 25 feet.

(I) A 10-foot vegetative buffer shall be maintained adjacent to wetlands within the Overlay. Land disturbance activities, including but not limited to grading and tree planting, shall be allowed within required wetland buffers so long as any disturbed area is replanted to Forsyth County Buffer Standards.

(J) Specialized UDC Requirements for Large Retail Developments Requirements set forth in Chapter 12 and Chapter 18, Articles of the UDC specifically for individual retail establishments encompassing 40,000 square feet of floor area or greater, or encompassing 75,000 square feet or greater, shall not apply within the Overlay.

(K) **Maintenance Requirements**

1. During any time a retail building exceeding 40,000 square feet is vacant after its initial opening (a “Vacant Retail Building”) for a period of at least 90 days (“Vacancy Period”), the owner of the building shall:
   a. Maintain all on-site parking areas and landscaping in the same condition as they had been maintained prior to the vacancy;
   b. Operate all lighting in the parking lot and other external areas, exclusive of identification signs, in the same manner as they had been prior to the vacancy period;
   c. Remove all outdoor identification signs from the site;
   d. Keep the building free of graffiti and repair all other acts of vandalism; and
   e. Provide security patrols on the site to deter vandalism or other illegal activities.

2. The owner of a retail building exceeding 40,000 square feet, regardless of the building’s occupancy status, shall be responsible for:
   a. Maintaining cleanliness of entire site by removing any trash, rubbish, or other debris from the premises;
   b. Maintaining landscaping and replacing dead or damaged plants; and
   c. Repair or replace building elements that are damaged, dilapidated or in disrepair (such as but not limited to broken windows).

3. Should the owner of a Vacant Retail Building fail to maintain the building and premises during the Vacancy Period in accordance with the requirements of this Article, the owner shall be subject to citation by the appropriate County Code Enforcement Office and shall be subject to the maximum fine permitted for ordinance violations for each such violation.

(L) **Adaptive Reuse**

1. If an individual retail establishment 75,000 square feet or greater (“Establishment”) is vacated, the owner and/or lessee (the “Owner”) shall submit a written adaptive reuse and marketing plan (a “Reuse Plan”) to the Director no later than the end of the 25th consecutive month of vacancy, unless events or circumstances beyond the Owner’s control prevent the submittal of the Reuse Plan.

2. The Reuse Plan shall include the reason(s) for the continued vacancy, potential use types for the vacant Retail Establishment, a marketing plan to be executed for the facility and a schedule for the implementation of the marketing plan (a “Schedule”). The Owner shall execute the Reuse Plan in accordance with the Schedule, unless events or circumstances beyond the Owner’s control prevent adherence to the Schedule.

3. If the Establishment remains vacant for 12 consecutive months after the Reuse Plan’s submittal date, the Owner shall provide the Director with annual written status reports regarding its plans to redevelop and/or reuse the property and the reason(s) for the property’s continuing vacancy.

(M) **Calculation of Area for Retail and Office Uses**

1. The area of retail uses within the Overlay shall be calculated using “Gross Leasable Area”, which shall mean the sum of the total horizontal areas of the several floors of all buildings on a lot, measured from the interior faces of exterior walls and from the center line of joint partitions and walls separating two (2) or more buildings. The term Gross Leasable Area shall exclude all outdoor dining areas, outdoor display areas that are accessory to enclosed retail stores, areas designed for permanent accessory uses such as public toilets, utility closets, mall food courts, mall management and security offices, mail distribution or delivery facilities, truck tunnels, enclosed parking areas, meter rooms, mall concourses, corridors not open to the public, rooftop mechanical structures, mechanical and equipment rooms and facilities, public and fire corridors, stairwells, elevators and escalators.
(2) The area of office uses within the Overlay shall be calculated using net rentable area in accordance with the “Standard Method of Measuring Floor Areas in Office Buildings ANSI/BOMA Z65.1 – 1996”, as adopted by The Building Owners and Managers Association (BOMA) International.

(N) Signage

(1) A comprehensive signage plan setting forth details relative to sign types, numbers, materials, construction, lighting, heights, and areas shall be submitted to the director for review and approval prior to the issuance of sign permits for each development within the Overlay (or each phase thereof).

(2) Commercial Signs.

(a) Wall Signs.

(i) Department store anchors over 80,000 square feet shall be allowed 3 signs (one per facade) up to 5% of the overall facade or a maximum of 600 square feet per sign.

(ii) The retail building connecting the department store anchors shall be allowed up to 8 signs up to 200 square feet per sign.

(iii) Office and hotel buildings over 5 stories are allowed 4 signs (one per facade) up to 5% of the overall facade area or a maximum of 600 square feet per sign, whichever is greater.

(b) Marquee Signs. Signs within the Overlay are allowed a maximum projection of 12 feet from the building wall.

(c) Monument Signs (fronting freeways and arterial/collector streets). No more than 2 signs may be located per entrance to a public street. Maximum sign area shall be limited to 300 square feet per side, not including wing walls. Signs shall be limited to a maximum height of 12 feet.

(d) Monument Signs (fronting local roads and private streets). No more than 12 signs may be permitted within the Overlay. Maximum sign area shall be limited to 60 square feet per side. Signs shall be limited to a maximum height of 10 feet.

(e) Pole Directional Signage. No more than 24 signs may be located within the Overlay. Maximum sign area shall be limited to 60 square feet per side. Signs shall be limited to a maximum height of 10 feet.

(f) Light Pole Graphics. Four-sided signs may be located on poles to serve as directional aids. Maximum sign area shall be limited to 15 square feet per side. Signs shall be limited to a maximum height of 12 feet.

(g) Georgia 400 Corridor Signage. A single pylon sign may be located along GA400. Maximum sign area shall be limited to 400 square feet. The sign shall be limited to a maximum height of 50 feet.

(3) Residential. All residential development within the Overlay shall be allowed separate signage as permitted per the Residential Zoning Standards of the Sign Ordinance.

(4) Notwithstanding any other provisions within this Article, the Office Residential Zoning Districts Performance Standards and Commercial or Industrial Zoning Districts in the Sign Ordinance shall not apply to the Overlay.

(O) Prohibited Uses. The following uses shall be prohibited within the Overlay.

(a) Convenience stores, with or without gasoline pumps.

(b) Gas stations.

(c) Adult novelty stores.

(d) Adult entertainment centers.

(e) Pawn shops.

(f) Tattoo parlors

21-9.9 Applicability. All properties within the boundaries of the Overlay shall be subject to the requirements of the UDC, the Sign Ordinance and the Tree Ordinance. Properties within Sub-Area 2 and Sub-Area 3 of the Overlay shall be subject to all requirements of this Article and the Plan. Sub-Area 1 may be developed in accordance with the Article and this Plan. The following provisions of this Article shall not apply to Sub-Area 1 of the Overlay if Sub-Area 1 does not conform to the Plan: Sections 21-9.4(A)(2), 21-9.4(B), 21-9.4(C)(2), 21-9.8(C)(6), 21-9.8(D)(1), 21-9.8(D)(2), 21-9.8(D)(3), 21-9.8(D)(4), 21-9.8(E)(1), 21-9.8(E)(3), 21-9.8(E)(4), 21-9.8(E)(5), 21-9.8(E)(6), 21-9.8(F), 21-9.8(N), 21-9.10(A), 21-9.10(B) and 21-9.10(C). Section 21-9.8(F)(1) shall not apply to Sub-Area 1 if Sub-Area 1 does not conform to the Plan; and the maximum residential density on the balance of the Overlay shall be reduced to 675 units. The requirements of the UDC, this Article and the Tree Ordinance shall apply
cumulatively to all properties within the Overlay so that each requirement is interpreted against the overall Plan, not any individual parcel or property.

21-9.10 **Administrative Interpretations.**

(A) The director is hereby authorized to administratively grant minor Plan amendments for individual parcels within the Overlay. A minor Plan amendment shall be effective only for the parcel(s) for which the amendment was requested and shall not affect any other parcel within the Overlay.

(B) Minor Plan amendments shall include, but are not limited to, adjusting lot lines and lease lines, reducing the size of individual uses, removing approved uses, modifying the layout of internal roads, relocating open space, reconfiguring building footprints and relocating buildings depicted on the Plan. Any proposed amendment to the Plan that is determined by the director to constitute a public interest that decreases the public open space by ten (10) percent or more, increases the density by ten (10) percent or more, or changes the Overlay boundaries shall be deemed a major amendment. The addition of proposed uses or the relocation of active amenities to a location closer to the Overlay boundaries than as shown on the Plan shall constitute major amendments. For all amendments to the Plan that are determined to be major amendments, the Board of Commissioners shall be required to hold a public hearing, but such hearing shall be limited specifically to testimony regarding whether the proposed amendment should or should not be approved.

(C) The director may approve requests for minor plan amendments based on the following considerations:

1. Whether the amendment conforms to the policy and intent of the Forsyth County Comprehensive Plan;
2. Whether the amendment would be suitable in view of the use and development of adjacent and nearby properties;
3. Whether the amendment would have an adverse effect on the usability of adjacent and nearby Property;
4. Whether the amendment would impose an excessive burden on streets, transportation facilities or utilities;
5. Whether there are existing or changing conditions affecting the use and development of the property that support the approval of the amendment.

(D) The director is not authorized to grant variances from the provisions of the underlying CBD zoning district. Deviations from the underlying CBD zoning district shall require the issuance of a variance pursuant to Article V and Article VI of the UDC.

(E) In the event of a conflict or inconsistency between this Overlay, as interpreted by the director, and (1) any other provision of the UDC, (2) the Sign Ordinance, or (3) the Tree Ordinance, this Article shall govern the development within the Overlay.

### TABLE 21.3  PERFORMANCE STANDARDS SUMMARY

</table>

Note 1 – Residential density within the Overlay shall not exceed a total of 875 units.
Note 2 – Setbacks and buffers do not apply to private streets, driveways, or lease lines/property lines within the Overlay.
Note 3 – The applicability of standards summarized in this table are subject to the provisions of section 21-9.10 of the Ronald Reagan/Union Hill Overlay District regulations.
ARTICLE X, CAMPGROUND-CASTLEBERRY-KELLY MILL-PITTMAN-POST-SHILOH ROAD OVERLAY DISTRICT:

21-10.1 Purpose. The purpose of this overlay district is to establish minimum standards for roadway fencing and landscaping that contribute to the district's recruitment and retention of businesses and enhancement of residential communities.

21-10.2 District delineation. The Overlay District shall consist of those parcels within the boundary identified on the Official Overlay District Map of Forsyth County. Regulations apply to parcels or portions of parcels that fall within 100 feet of the centerline of Campground Road, Castleberry Road, Kelly Mill Road, Post Road, Pittman Road and Shiloh Road.

21-10.3 Board Fences along Roadways. Board fences shall be installed along Post Road, Castleberry Road, Shiloh Road and Pittman Road.
   (A) For all properties, four board style black fences shall consist of a minimum 1-inch thick, four (4) inch wide fence board affixed to four (4) inch posts spaced a maximum of ten (10) feet apart. The Board fences shall be a minimum of four (4) feet and a maximum of six (6) feet in height. Natural stone or brick masonry columns may be used in the fence design. Fences shall be constructed using high quality materials to ensure low repair and maintenance cost.
   (B) Fence materials shall be comprised of treated lumber, fiber cement, vinyl or steel.
   (C) Chain link or coated chain link fencing is prohibited along the road frontage.
   (D) Individual lots of record within residential or agricultural districts are exempt from this requirement.

21-10.4 Landscaping along Roadways. For all properties, a minimum fifteen (15) foot wide landscape strip shall be provided along the proposed future right of way of Post Road, Castleberry Road, Shiloh Road and Pittman Road.
   (A) Three rows of plantings, with one of these rows in front of the fencing are required. Three levels of scale shall include herbaceous perennials, shrubs and trees.
   (B) All landscape strips shall contain a minimum of one overstory tree and fours shrubs per fifty (50) linear feet of strip length. All proposed shrubs shall be a minimum of three-gallon container size and two (2) feet in height at time of planting. All proposed overstory trees shall be a minimum three-inch caliper at time of planting. Trees and shrubs may be grouped or staggered and need not be evenly spaced within the strips.
   (C) Landscape strips shall be located outside utility easements.
   (D) Required fences shall be incorporated into the design of the frontage landscape strip and shown on the landscape plan.

21-10.5 Design plan review. Plan review shall be performed by county staff. Site development plans, and landscape plans must be submitted to the department at the time of application for a land disturbance permit. Submitted plans shall address and conform to all provisions set forth under chapter 21, article X.
ARTICLE XI, BUFORD HIGHWAY OVERLAY DISTRICT:

21-11.1 Purpose. The purpose of this overlay district is to establish minimum standards for any site development, exterior architectural design, landscaping, lighting and signage that contribute to the district’s overall character. This is accomplished through enhancement of commercial growth through unity of design and quality architecture and the creation of visual interest through landscape and architectural features. Design standards are intended to ensure coordinated design of building exteriors in order to promote visual congruence, positively impact adjacent properties, and produce buildings that augment the character and appearance of the area. It is the goal of this ordinance to promote freedom in design while establishing a baseline for design compatibility. This goal is in accordance with the County’s objective to encourage landscaping, signage, building design, and other development regulations that enhance the image of the County and create value as stated in the implementation program of the Comprehensive Plan. In addition, this overlay is intended to increase design functionality of vehicle related establishments and to mitigate impacts of commercial uses on residential areas through additional site design considerations. Buford Highway is a major arterial roadway that handles significant volumes of traffic and is therefore highly visible to the traveling public. The enhancement of this well-traveled corridor through a unification of its visual context by way of appropriate design measures offers benefits such as the protection of land values through improved appearance and utility that may foster business attraction.

21-11.2 Delineation of District. The Buford Highway Overlay District applies to all properties indicated on the Official Overlay District Map of Forsyth County. Where land is located in the Buford Highway Overlay District, the regulations governing development in the overlay district shall apply in addition to the regulations governing development in the underlying base zoning district. In the event of an express conflict between the standards governing a base zoning district and those governing this overlay district, the standards governing the overlay district shall control. The Overlay regulations apply to any parcel that falls wholly or partially within 1,000 feet of the centerline of Buford Highway/Canton Highway.

21-11.3 Permitted Uses. All uses allowed in the underlying zoning districts as established by this Code, except for those listed below, are permitted in the Buford Highway Overlay District.

(A) Theaters, except if otherwise located within a planned commercial or mixed use development.
(B) Electronic game playing centers
(C) Adult entertainment centers
(D) Adult novelty stores
(E) Pawn shops
(F) Pool halls
(G) Tattoo parlors
(H) Massage parlors, except massage establishments that provide massage services as well as facials, chemical peels, muscle stretch and therapy services, aromatherapy and foot treatments.
(I) Landfills
(J) Transfer stations
(K) Trailer parks
(L) Temporary buildings except construction trailers in commercial and industrial districts
(M) Electronic message boards/Changeable copy signs, with the exception of fuel stations, including any upgrades to preexisting signs regardless of general allowance of such upgrades in the Forsyth County Sign Ordinance and this Code.
(N) Chemical storage facilities
(O) Panhandling
(P) Self-service car wash facilities
(Q) Building supply yards
(R) Fuel tank lease and sales establishments
(S) Large scale retail, as defined in section 21-6.4(A), east of Twin Branches Road and on any parcel of less than seven (7) acres between Nuckolls Road and Twin Branches Road.
(T) Vehicle rental establishments, vehicle sales dealerships and fuel stations east of Twin Branches Road and vehicle rental establishments and vehicle sales dealerships and parking decks on any parcel of less than seven (7) acres between Nuckolls Road and Twin Branches Road.
(U) Smoke shops and vape/e-cigarette stores
(V) Marijuana or THC dispensaries excluding licensed pharmacies

21-11.4 Design Plan Administrative Review. Design review shall be performed by department staff. Architectural elevations, exterior finish schedules, landscape and signage plans must be submitted to the department.
at the time of application for a land disturbance permit. Lighting plans must be submitted prior to the issuance of a
building permit. See Chapter 7 and Chapter 18 of this Code for land disturbance and building permit procedures. All
plans shall address and conform to all provisions set forth under Chapter 21, Article XI. Any numerical
nonconformance to the standards contained within this Article shall require the submittal of a variance application in
accordance with section 8-6.4 of this Code. Should a design not meet all of the non-numerical standards contained
within this Article, then the proposed design must be submitted, for public hearing, to the Forsyth County Board of
Commissioners for review and approval as an Alternate Design. In considering whether to approve such Alternate
Design, the Board of Commissioners shall consider the Special Considerations set forth in section 8-5.5(F)(2)(b) of
this Code.

21-11.5 **Site Design Standards.**

(A) Any new development, building expansion, expansion of outdoor storage, outdoor display, or parking
areas will trigger conformance of the entire property to current site design standards, including but not
limited to landscape strips, parking islands, and any applicable screening.

(B) Parking for commercial establishments shall be distributed along not less than two sides of the building
exterior. Parking that fronts the main building entrance(s) shall have no more than sixty (60%) percent
of the total number of parking spaces or 300 parking spaces, whichever is less.

(C) New commercial developments and substantial improvements to existing commercial developments
shall provide for pedestrian and automobile access connections between adjacent properties when feasible.

(D) Sidewalks shall connect the rights-of-way with all non-residential main building entrance(s). Sidewalks
shall be no less than five (5) feet in width. Sidewalks may be permitted within required landscape strips
on a case-by-case basis upon thorough review of the landscape plan in order to still meet the intent of
this Code and protect the public health, safety, and welfare.

(E) Where pedestrian crossings cross parking areas and drives, decorative paving material (i.e., pavers,
stamped or textured concrete, or color concrete) shall be used to delineate the pedestrian crossing.

(F) Speed bumps are prohibited within commercial developments. Speed tables are permitted.

(G) Retaining walls shall be faced with stone and brick when visible from the right-of-way.

(H) **Landscaping.** The intent of this section is to require the integration of all landscape improvements with
the overall project requirements. All plant materials shall be used to enhance the existing area,
particularly as viewed from an adjacent right-of-way, and to mitigate development impacts. Landscape
plans shall be submitted to the department for design review. The following is in addition to Ordinance
No. 98 (Tree Protection and Replacement Ordinance) and shall be implemented:

1. Plant materials shall be used as accent elements at roadside entryways to provide a definite sense of
arrival to commercial properties. Plant materials shall consist of ground cover, herbaceous
ornamentals, shrubs, understory, and/or overstory trees adjacent to the establishment’s monument
sign(s). These materials shall be clustered while maintaining adequate sight distance to and from
the entryway. Entryway plantings shall be compatible with adjacent landscape areas in species
selection and provide a cohesive transition between landscape plantings. All landscape areas shall
incorporate a minimum of forty (40%) percent evergreen trees and shrubs within each area.

2. All landscape areas shall incorporate a minimum of forty (40%) percent evergreen trees and shrubs
within each area. All landscape areas shall also incorporate a minimum of twenty-five (25%) percent
native plant material. Such plant material must be indigenous to the Southeastern U. S. and
be approved by the County arborist.

3. A minimum 25 foot wide landscape strip shall be provided along the proposed future rights-of-way
and reservation lines of SR 20/Buford Highway from GA Highway 400 to Twin Branches Road. A
minimum 35 foot wide landscape strip shall be provided along the proposed future rights-of-way of
Buford Highway from Twin Branches Road to the Chattahoochee River. In addition, fencing
consistent with the composition and design criteria set forth below shall be installed within the
landscape strip immediately adjacent to the proposed future rights-of-way of SR 20/Buford
Highway.

(a) For all properties, fencing shall be four board style black fences consisting of a minimum one
(1) inch thick, four (4) inch wide fence board affixed to four (4) inch posts spaced a maximum
of ten (10) feet apart. The board fences shall be a minimum of four (4) feet and a maximum of
six (6) feet in height. Natural stone or brick masonry columns may be used in the fence design.
Fences shall be constructed using high quality materials in accordance with section 21-11.5(I)
to ensure low repair and maintenance cost.
(b) Individual lots of record within residential or agricultural districts are exempt from this requirement.

(4) All landscape strips are required to contain a combination of vegetative ground cover, herbaceous ornamentals, and low to mid-level shrubs in addition to large canopy trees. Shrubs shall be a minimum of two (2) feet high every five (5) feet on center at time of planting. A minimum of three (3) canopy trees per fifty (50) linear feet is required. Each tree shall have a minimum two (2) inch caliper and be at least eight (8) feet high at time of installation. Tree and shrub placement may be grouped and staggered rather than following a regulated line along the road frontage. Trees shall count towards the tree density requirements as outlined in Ordinance 98 (Tree Protection and Replacement Ordinance).

(5) For all lot corners abutting right-of-way on two sides, extending a minimum of fifty (50) linear feet from the corner point on each side paralleling the rights-of-way, a minimum of four (4) enhanced rows of plant material to include a combination of shrubs and perennials in addition to groundcover other than turf shall be required. Spacing of plant material shall be adequate to provide a dense, full appearance. These understory plantings shall be integrated with the canopy tree requirements.

(6) If the developer opts to provide an additional five (5) feet to the landscape strip to satisfy Section 17-5.7(C) of this Code, then the total width of the front landscape strip shall be thirty (30) feet or forty (40) feet subject to Subsection (D)(3), above. A minimum of 10 feet of the required landscape strip, as applicable, shall be located behind utility easements so plant material will not be disturbed after installment.

(7) Ground mounted equipment, such as power transformers and light poles, are prohibited within required landscape parking islands.

(8) **Landscape Installation and Maintenance.** Certification by a registered landscape architect verifying that landscaping meets the standards of this code and the approved plans must be submitted. In addition, the contractor responsible for landscape installation must certify that all plant material has been installed per the approved plans. These certifications must be submitted prior to the approval of the as-built and/or final plat. The Property Owner shall be responsible for maintenance of required landscaping.

(9) All dead and damaged plant material within landscaped areas must be replaced with a similar species within one month. If weather conditions are not appropriate for replanting, the property owner may postpone replacement for up to six (6) months. Replacement trees and shrubs shall be of similar size to the original installation size of the trees or shrubs being replaced.

(10) **Performance Security.** When planting stock availability is low or weather conditions are not appropriate for planting new trees, shrubs, and/or perennials, the property owner may postpone planting for up to six (6) months, provided that performance security is posted with Forsyth County in accordance with the conform to the following specifications where applicable:

   (a) Security shall be submitted to the department with appropriate documentation showing stock availability and weather conditions necessitating the postponement of planting.

   (b) Security shall be in an amount equal to one hundred and ten (110%) percent of the cost of materials, installation, and guarantee, as demonstrated by a signed contract between the owner and a landscape contractor.

(I) **Fencing.**

   (1) Fence materials shall be comprised of treated lumber, fiber cement, or steel.

   (2) Chain link fencing is prohibited for all property lines along SR 20/Buford Highway. Black or brown vinyl coated chain link fencing may be allowed along the sides and rear of property fronting SR20/Buford Highway, but not those property lines bordering or within view of residential property, if the chain link fencing is screened with evergreen trees, shrubs, and/or decorative fencing for the full length and height of the fence.

   (3) For permitted open air businesses, no chain link fence shall be visible from the right-of-way.

(J) **Civic Space.** The inclusion of civic space in future site development is highly desired. Examples of civic space include, but are not limited to a passive or active park, pocket park, square, plaza, playground, as well as the inclusion of public art installations.

21-11.6 **Architectural Design Standards.** The architectural design standards established herein apply to all commercial development. They are intended to achieve a base level of quality for architectural and landscape design that is responsive to its context and contributes to the overall character of the Overlay District. The architectural criteria listed below establish minimum design standards for buildings within the Overlay District in order to reduce
Chapter 21, Overlay Districts
Unified Development Code of Forsyth County - 21 - 40 -

the impacts of commercial development on adjacent properties. The highest quality of architectural design and innovation is encouraged. These standards are in addition to the design criteria contained in Chapter 12 of this Code.

(A) **Commercial Building Materials and Architectural Treatments.** The following design standards, guidelines, and enhancements are established to create a sense of architectural consistency throughout the Overlay District and to ensure high quality architectural design.

1. Exterior building materials on all commercial development shall consist of a minimum of seventy-five (75%) percent per vertical wall plane of brick, natural or pre-cast stone, and/or glass. If multiple establishments are contained within one contiguous structure, the percentage pertains to the entire façade rather than individual façade fronts.

2. Accent wall materials on all commercial development shall not exceed twenty-five (25%) percent per vertical wall plane. Accent building materials include, but are not limited to, stucco, cementitious and wood siding, and architectural grade metal. If multiple establishments are contained within one contiguous structure, the percentage pertains to the entire façade rather than individual façade fronts. Smooth, split face and/or rib faced concrete masonry units, aluminum siding, vinyl siding, tile, tilt/precast concrete, and corrugated steel are prohibited.

3. The principal entry area of a building, or if in a shopping center the largest tenant or a central location of a group of buildings, shall be articulated and should express greater architectural detail than other portions of the building. Entries shall include at least three of the following or similar architectural elements:
   - Overhangs
   - Canopies
   - Recesses/projections
   - Columns
   - Arcades
   - Corniced parapets over the door
   - Peaked roof forms
   - Arches
   - Display windows
   - Integral planters or wing walls that incorporate landscaped areas and/or places for sitting

4. Façades over fifty (50) feet in length must incorporate wall projections or recesses a minimum of twelve (12) inches in depth. The combined length of said recesses and projections must constitute at least twenty (20%) percent of the total façade length.

5. Freestanding accessory structures shall have architectural detailing and design elements consistent with the primary buildings of the development complex to provide a cohesive design.

6. **Roof Features.**
   - For commercial buildings under 25,000 square feet, roofs shall be gable, pyramidal, or hip style. Shed roofs are permitted over porches, and additions. For buildings 25,000 square feet and above, the requirements in section 12-11.6(C) and (D) of this Code shall apply.
   - The roof pitch of sloped roofs shall be a minimum of 4:12.
   - Roof materials shall be wood shingles, wood shakes, standing-seam paint grip galvanized metal, slate or asphalt shingles (architectural weathered, or wood), or concrete simulated slat or wood shingles.
   - Roof styles for multi-building complexes shall be compatible and consistent with roof designs for the entire complex.
   - Vents and stacks shall be painted to match the roof material and hidden from view to the extent possible.
   - Gutters may be ogee or half-round with round downspouts, metal-lined wood, or architecturally formed or molded. Gutter finishes may be copper, unpainted galvanized metal, or color to resemble galvanized metal.

7. Burglar bars, fiberglass awnings, and steel-roll down curtains are prohibited except at the structure’s rear. Burglar bars are prohibited on the rear if visible from a public street. Burglar bars are also prohibited on the rear of an outparcel building if visible from the main structure.

8. At least five (5%) percent of the total land area of a commercial development shall be used as common area. This area shall be located between the primary building entrance and the right-of-
way and include some combination of seating, fountains, landscaped focal point, public art installation, or similar features.

(9) Stormwater detention and retention ponds that require a fence must not be visible from the public right-of-way unless a twenty (20) foot planted buffer is provided outside of the exterior pond fence. Access to the pond shall not be facing the public right-of-way.

(B) **Color.** All exterior painted surfaces on commercial structures visible from the right-of-way shall be painted in neutrals and earth tones. Neutrals refer to blacks, whites, beiges or grays while earth tones refer to brown, umber, sienna, terracotta and brick tones. Fluorescent colors and those bright in intensity are prohibited. Glass, metal, natural stones, and sign faces are excluded from the color requirements.

(C) Commercial and mixed-use buildings up to four (4) stories are permitted within the Haw Creek Community Node as identified on the Comprehensive Plan’s community character map. Commercial and mixed-use buildings outside of the Haw Creek Community Node are limited to three (3) stories.

(D) **Residential Architecture.** The following design standards pertain to all newly constructed residential development.

1. Residential structures along existing public right-of-way shall require any side or rear facade that is visible from the public right-of-way to include the same exterior finish materials and similar landscaping as the front of the structure. In addition, it shall include windows and architectural features similar to the front façade, including but not limited to, awnings, cornice work, edge detailing or other decorative finish materials.

2. All roof vents, pipes, antennas, satellite dishes, and other roof equipment (except chimneys) shall be located on the rear elevations and, except for satellite dishes, be painted to match the color of the roof or, if technical considerations prevent installing satellite dishes on the rear elevation, then such equipment shall be installed at a location where it will have minimal visual impact as seen from the street.

3. Trash enclosures in amenity areas and lots are to be constructed with a walk-in entrance, solid metal gates, and a decorative cover. Enclosures shall have sufficient size to house both the recycling and refuse bins.

4. Utility equipment and service meters are to be located away from high visibility and usage areas and effectively screened from view. The use of enclosed structures or interior access to utility equipment and meters is encouraged. The use of utility closets on exterior walls is prohibited.

5. Common mail facilities shall be covered, include a trash receptacle, and provide a minimum of two dedicated parking spaces if not located within an amenity area.

6. Multi-family residential buildings shall utilize a mixture of materials including brick, stone, cementitious siding, stucco and/or have the appearance of a commercial storefront. EIFS is prohibited. Use of materials should vary and not exceed 50% of any one type per building side to provide visual interest.

(E) **Exterior Lighting.** All lighting shall be designed to integrate with the overall development character. The following standards are the minimum standards intended to ensure that lighting will avoid adverse impacts on adjacent properties and rights-of-way.

1. Lighting shall be architecturally integrated with the style, material, and color of on-site structures.

2. For any commercial use, a freestanding pole light shall not exceed eighteen (18) feet in height and shall have a black metal finish.

3. For all residential developments, a freestanding pole light shall not exceed sixteen (16) feet in height and have a black metal finish.

4. Exposed neon, neon tube lighting, and fluorescent lighting are not permitted.

5. The use of LED garland or string lights to outline windows, buildings, signs, and similar features is prohibited.

6. Building-mounted lighting shall highlight architectural features and not illuminate the entire building façade.

7. All canopy luminaries shall be fully recessed and utilize flat lenses.

8. Promotional beacons, search lights, laser source lights, strobe lights or any similar light when projected above the horizon, and lighting used for causing sky glow to attract attention in excess of the lighting used to provide safety, security and utility are prohibited. Projects that want to integrate lines or rows of lights within a defined pedestrian plaza may seek administrative approval upon submission of lighting specifications. Such lights shall not be placed permanently on building exteriors.
(F) **Screening.** In addition to the regulations set forth in Chapter 12 and Chapter 14, the following standards shall apply:

1. Accessory site features including, but not limited to, meters, meter boxes, electrical transformers, and other equipment located on the ground shall be screened from view from public rights-of-way, residential uses, or any residential or agricultural zoning category by placement behind the main building, 100% opaque fencing, a six (6) foot berm and/or a vegetative screen planted according to County buffer standards.
2. Roof mounted equipment and other accessories shall be screened from view from the public rights-of-way, residential uses or any residential or agricultural zoning category by a parapet, gable roof, roof screen, or other architectural feature. Roof equipment and roof screens shall be finished to match the roof or parapet wall. When the relationship between building roofs and adjoining public streets and/or residential developments make screening of roof equipment impossible (e.g. road higher than roof), a parapet of no less than five (5) feet in height shall be installed.
3. All dumpsters and compactors shall be enclosed on three sides by materials and architectural elements to match the primary structure and gated on the fourth side.
   a. The enclosure shall be at least one (1) foot taller than the highest point of the dumpster or compactor.
   b. The gate shall be composed of decorative metal or other durable materials which shall reach the height of the three sided enclosure and with colors coordinated with those of the primary structure. Chain link material is prohibited.
   c. All dumpsters and compactors shall be equipped with lids.
4. Loading areas shall be screened from rights-of-way, residential uses, or any residential or agricultural zoning category by placement behind the main building or appropriately scaled wall, the use of earthen berms that are no less than five (5) feet in height and/or a vegetative screen planted according to County buffer standards.
5. Businesses requiring a fleet of service vehicles shall park such vehicles behind the building or otherwise provide adequate screening to ensure the vehicles are not visible from the public right-of-way.
6. Drive-through facilities and stacking lanes for any facility type, when contiguous to any right-of-way, residential use, or pedestrian gathering area shall be obscured from view by an earthen berm and/or a vegetative screen, that is no less than six (6) feet in height planted according to County buffer standards.
   a. Stacking lanes and bypass lanes shall be designed in a manner so that vehicle queuing does not interfere with access driveways, interparcel connections, or maneuverability in and out of off-street parking spaces. No drive-through shall exit directly onto the right-of-way.
   b. Car wash openings shall be oriented away from the right-of-way.
7. Storage of shopping carts shall be located indoors. Where indoor storage is not feasible, shopping carts shall be located adjacent to the building and screened by an enclosure made of masonry to match the exterior building materials.
   a. Shopping cart corrals in parking areas shall be curbed within parking islands so that additional railings are not required for secure cart positioning.
   b. Parking islands that contain cart corrals must include four hundred (400) square feet of landscaped space.
   c. One (1) identifying sign at the rear of each corral is permitted for visibility within the parking lot.
8. Walls or fences when visible from the right-of-way, or from any residential property, shall complement the exterior materials of the primary structure on site.
9. In order to decrease noise and disturbance to residential areas, all fencing visible from residential properties shall be shielded from view by an earthen berm with a vegetative screen that is no less than six (6) feet in height, planted according to County buffer standards.

21-11.7 **Signage.** The following regulations are the minimum standards intended to promote an appropriate and cohesive identification program within the Buford Highway Overlay District. A detailed signage plan is required to be submitted that addresses and conforms to all provisions set forth in this section. The signage plan shall address sign dimensions, materials, height, color scheme, lighting, and location of each sign on the building and on the ground. In addition to Ordinance 74 (Sign Ordinance), the following shall apply:
(A) Monument sign structures and base materials shall be compatible with the color, texture, material, and architectural design of the principal building.

(B) Freestanding signs shall adhere to standards outlined in the chart below:

<table>
<thead>
<tr>
<th>Gross Building Space</th>
<th>Maximum Height of signs</th>
<th>Maximum Number Allowed</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 - 10,000</td>
<td>6'</td>
<td>1 per Road Frontage</td>
</tr>
<tr>
<td>10,001 - 50,000</td>
<td>8'</td>
<td>1 per Road Frontage</td>
</tr>
<tr>
<td>50,001 - 100,000</td>
<td>10'</td>
<td>1 per Road Frontage</td>
</tr>
<tr>
<td>100,000 +</td>
<td>12'</td>
<td>2 per Road Frontage</td>
</tr>
</tbody>
</table>

(C) Wall signs shall not cover architectural features or details, and not extend beyond the roof line or outer edges of the building.

(D) Wall signs and monument signs shall not be of the singular plastic insert or panel sheet variety. Channel letters are strongly encouraged for both monument and wall signs. If internally illuminated, lettering shall be individually formed and lighted.

(E) Where there is more than one sign on a site, signs shall be complementary to each other in shape and related components and type of construction materials.

(F) Any exterior light source shall be completely shielded and directed solely on the sign and not upon any other object or adjacent properties.

(G) Wall mounted raceways shall be painted to match the adjoining structure.

(H) Temporary signs, including inflatable or forced-air signs, tarps, banners, sign dancers, and any sign mounted on wheels, are prohibited within the boundary of the Buford Highway Overlay. Permanent and temporary signs in windows are also prohibited.

(I) Fuel station canopy signs are allowed, one per road frontage not to exceed twenty (20) square feet. Sign must be flush against the canopy fascia. The canopy shall not exceed twenty-five (25) feet in height from the ground to the top of the fascia.

(J) Electronic message boards or changeable copy are permitted for fuel station monument signs, one per road frontage. The total electronic or changeable copy area for each sign shall not exceed a total of forty-six (46) square feet.

21.11.8 Fuel Stations. These regulations shall apply to all fuel stations including convenience stores with fuel dispensers.

(A) Access and Internal Circulation. Provisions for on-site stacking lanes should be provided to supply adequate room around the fuel pump islands without creating traffic congestion either in adjacent vehicular travel lanes or along the rights-of-way external to the development. If an applicant wishes to request an exemption to this provision, a statement signed by a state licensed engineer shall be submitted to the Planning and Community Development Department, which states that stacking lanes with additional queuing space are not necessary. Any stacking lanes that are provided shall be identified on the site plan.

(B) Setbacks. Pump islands in NS and UV districts shall be located a minimum of 50 feet from all rights-of-way.

(C) Parking. No trailers or vehicles shall be parked with the intention of advertising the trailer or vehicle for sale or rent.

(D) Architectural Design.

1. All site walls, screen walls, pump island canopies, canopy support columns and other outdoor covered areas shall be architecturally integrated with the building using similar materials, colors, and detailing. The design of a facility that shares access with a commercial center shall be designed to reflect the design elements of that center.
(2) Business identity, either by awnings, accent bands, paint or other applied color schemes, signage, parapet details and other design embellishments shall not be a dominant architectural feature.

(3) Building accents shall be expressed through differing materials or architectural detailing rather than applied finishes such as paint.

(4) Either a pump island curb or bollard is required for protection of fuel dispensing units.

**(E) Canopy.**

(1) Lighted or painted bands of corporate color are prohibited.

(2) The sides (fascia) of the canopy shall extend below the canopy roof 12 inches to minimize the direct view of the light from adjoining property.

(3) Lighting shall not be mounted on the top of the canopy and the sides shall not be illuminated either internally or externally. This requirement does not pertain to signage attached to the canopy that is internally illuminated.

(4) Canopies in NS and UV districts shall not extend closer than 35 feet to any right-of-way.

**(F) Display and Storage.**

(1) All display items for sale shall be located within the main building or within designated areas that are screened from rights-of-way.

(2) Promotional displays shall not impede pedestrian ingress and egress or vehicular traffic sight lines.

(3) Soft drinks, candy, cigarettes and other similar item dispensers may not be located outside the main building unless the dispenser is enclosed or set behind a masonry partition that matches the principal building in material and color.

**(G) Landscaping.** One continuous row of evergreen trees shall be planted for fifty (50%) percent of the entire length of pump island areas that are adjacent to rights-of-way. Such trees shall be planted no farther apart than ten (10) feet on center.

21-11.9 **Vehicle Sales, Service, Parts and Repair Facilities.** Establishments that sell, lease or rent vehicles and those that provide vehicle service, parts and/or repair must provide parking specifically identified and devoted to customers. Multilevel parking decks or structures are permitted, provided that such decks/structures 1) have the same architectural treatment as the principal building(s) of the establishment, 2) have a height that does not exceed the height of the principal building(s), and 3) are set back a minimum of 150 feet from all residentially zoned properties. Adequate space must be allocated, specifically identified, and reserved on the site for the unloading of vehicles brought to the site by vehicle carriers. No trailers or vehicles shall be parked in customer parking or unloading areas with the intention of advertising the trailer or vehicle for sale or rent. Outside loudspeakers shall not be permitted. In addition, such facilities shall comply with the following:

**(A) Architectural Design.**

(1) A facility that shares access with a commercial center shall be designed to reflect the design elements of that center.

(2) Business identity, either by awnings, accent bands, paint or other applied color schemes, signage, parapet details and other design embellishments shall not be a dominant architectural feature.

(3) Building accents shall be expressed through differing materials and architectural detailing rather than through applied finishes such as paint.

**(B) Display and Storage.**

(1) All accessory retail merchandise such as vehicle parts, tires, lubricants, fuels, or other materials shall be stored within the building(s).

**(C) Business Office.**

(1) A permanent structure for the use of a business or sales office is required for all vehicle sales, leasing and rental establishments.

21-11.10 **Vehicle Service, Parts and Repair Facilities, Not Including Vehicle Sales.** The following regulations shall apply to all vehicle service, parts and repair facilities including car wash facilities, whether they are automated or staffed establishments, when not combined with vehicle sales, leasing or rental activities.

**(A) Access and Internal Circulation.**

(1) Access to service bays shall be from the side or rear of the establishment or related screening devices or methods such as landscaping shall be used to partially screen the view from the right-of-way into service work areas.

**(B) Architectural Design.**

(1) A facility that shares access with a commercial center shall be designed to reflect the design elements of that center.
(2) Business identity, either by awnings, accent bands, paint or other applied color schemes, signage, parapet details and other design embellishments shall not be a dominant architectural feature.

(3) Building accents shall be expressed through differing materials or architectural detailing and not through applied finishes such as paint.

(C) **Display and Storage.**

(1) All retail merchandise such as vehicle parts, tires, lubricants, fuels, or other materials shall be stored within the building(s).

21-11.11 **Flags.** A single flag shall be allowed per site with the flag pole being a maximum of 60 feet in height and the flag area being a maximum of 150 square feet.
ARTICLE XII, COAL MOUNTAIN OVERLAY DISTRICT:

21-12.1 **Purpose.** The purpose of this overlay is to foster visual unity through an elevated level of design quality applied throughout the district while simultaneously fostering the individuality of three distinct character nodes whose unique identity has come about through historic settlement and land use. The Coal Mountain Overlay seeks to highlight and promote the character of these nodes through tailored site design, architecture, signage, and lighting standards. These enhanced destinations will then be bridged by a landscaped arterial spine throughout the overall district boundary. In these ways, the Overlay provides the framework for showcasing the local character of the district.

21-12.2 **Delineation of District.** The Coal Mountain Overlay District applies to all properties indicated on the Official Overlay District Map of Forsyth County. Where land is located in the Coal Mountain Overlay District, the regulations governing development in the overlay district shall apply in addition to the regulations governing development in the underlying base zoning district. In the event of an express conflict between the standards governing a base zoning district and those governing this overlay district, the standards governing the overlay district shall control. Improvements to existing residential structures are exempt, but such exemption shall not apply to an existing residential structure being converted to a nonresidential use. In the event of a conflict or inconsistency between the provisions of this Article and any provision of the Forsyth County Sign Ordinance, this Article shall govern the development of the property within the boundaries of the Overlay.

21-12.3 **Permitted Uses.** All uses allowed in the underlying zoning districts as established by this Code, except for those listed below, are permitted in the Coal Mountain Overlay District.

(A) Electronic game playing centers
(B) Adult entertainment centers
(C) Adult novelty stores
(D) Pawn shops
(E) Pool halls
(F) Tattoo parlors
(G) Massage parlors, except massage establishments that provide massage services as well as facials, chemical peels, muscle stretch and therapy services, aromatherapy and foot treatments.
(H) Landfills
(I) Transfer stations
(J) Trailer parks
(K) Temporary buildings except construction trailers in commercial and industrial districts
(L) Electronic message boards/Changeable copy signs, with the exception of fuel station monument signs, including any upgrades to preexisting signs regardless of general allowance of such upgrades in the Forsyth County Sign Ordinance and this Code.
(M) Chemical storage facilities
(N) Smoke shops and vape/e-cigarette stores
(O) Marijuana or THC dispensaries excluding licensed pharmacies
(P) Self-service car wash facilities
(Q) Panhandling

In addition to the uses above, the following uses are not permitted within the boundaries of the identified nodes:

(R) Building supply yards
(S) Fuel tank lease and sales establishments
(T) Vehicle sales and dealerships

21-12.4 **Design Plan Administrative Review.** Design review for development within the Coal Mountain Overlay shall be performed by staff with the input and assistance of the district commissioner. All plans shall address and conform to all provisions set forth under Chapter 21, Article XII. Any numerical nonconformance to the standards contained within this Article shall require the submittal of a variance application in accordance with section 8-6.4 of this Code. Should a design not meet all of the non-numerical standards contained within this Article, then the proposed design must be submitted, for public hearing, to the Forsyth County Board of Commissioners for review and approval as an Alternate Design. In considering whether to approve such Alternate Design, the Board of Commissioners shall consider the Special Considerations set forth in section 8-5.5(F)(2)(b) of this Code. Architectural elevations, exterior finish schedules, landscape, and lighting plans must be submitted to the department at the time of application for a land disturbance permit. See Chapter 7 and Chapter 18 for land disturbance and building permit procedures.
21-12.5 **Site Design Standards.**

(A) **Access.** Access standards are intended to provide safe and convenient vehicular and pedestrian access within developments and between adjacent developments and to lessen traffic congestion and increased connectivity.

1. New developments and substantial improvements to existing developments shall provide for pedestrian and automobile access connections between adjacent properties shall prepare and have recorded in the real property records of the county cross access connection easements to confirm such access. The Director shall have the discretion to waive this requirement if the anticipated land uses are incompatible.

2. Parcels and buildings must be arranged and designed so as to allow for the opening of future streets and must provide access to those areas not presently served by streets. No development may be designed to completely eliminate street access to abutting parcels.

3. The stub-out street right-of-way, pavement, and curbing must extend to the boundary of the abutting parcel at the point where the connection to the anticipated street is expected.

4. If a stub-out street exists next to an abutting parcel, the street system of any new or substantially renovated development must connect to the stub-out street to form a through street.

5. The department may eliminate the requirement for a stub-out street or require pedestrian and bicycle-only access when steep slopes in excess of twenty-five (25%) percent, freeways, waterways, tree conservation areas, stream buffers, cemeteries, open space or easements would make the provision of a stub-out street infeasible.

6. Where pedestrian crossings must cross parking areas and drives, decorative paving material (i.e., pavers, stamped or textured concrete, or colored concrete) shall be used to delineate the pedestrian crossing.

(B) Any new development, building expansion, expansion of outdoor storage, outdoor display, or parking areas will trigger conformance of the entire property to current site design standards, including but not limited to landscape strips, parking islands, and any applicable screening.

(C) **Landscaping.** Landscape treatment shall serve to create as well as reinforce identity through the formation of a spine for the Coal Mountain Overlay by establishing a corridor of uniformity that runs through each character node providing an element of consistency throughout the district. Plant material and design decisions are to be thoughtfully considered as complementary to architectural features and integral to the beauty of the area. These landscape standards shall apply to both residentially and non-residentially zoned properties with the exception of streets internal to residential subdivisions. In addition to landscape regulations, the County welcomes opportunities to form roadway median adoption programs and encourages partnerships that aid continued beautification efforts. Ongoing commitment from partners is necessary to implement preferred design measures and to provide proper maintenance. Landscape plans shall be submitted to the department for design review. The following is in addition to Ordinance No. 98 (Tree Protection and Replacement Ordinance) as well as any required buffer, and shall be implemented:

1. Plantings shall be compatible in regard to species selection and must provide a cohesive transition between landscape areas.

2. A minimum twenty (20) foot wide landscape strip shall be installed along existing or proposed rights-of-way for all development within the Coal Mountain Overlay District; except that to the extent a specific zoning designation establishes a greater landscape strip requirement than this Overlay, the larger requirement shall control. These landscape strips shall be located behind utility easements so plant material will not be disturbed after installation.

3. All landscape strips shall be composed of shrubs and/or herbaceous plants in addition to the prescribed tree pairings listed below. The remaining ground area shall be sodded, seeded, or hyroseeded with grass and/or planted with groundcover species.

   a. A minimum of 40% of all trees and shrubs shall be evergreen plant material. The percentage shall be based on the total number of installed trees and shrubs.

   b. Landscape strips shall include a minimum of two (2) trees and six (6) shrubs per fifty (50) linear feet, with a minimum of 60% overstory requirement. Trees shall count towards the tree density requirements as outlined in Ordinance 98 (Tree Protection and Replacement Ordinance).

   c. Plants should be of larger caliper and size to create a pleasant and immediate impact upon installation. Overstory trees shall have a minimum three (3) inch caliper and at least ten (10) foot height at time of installation. Understory trees shall have a minimum two (2.0) inch caliper.
and at least eight (8) foot height at time of installation. All proposed shrubs shall be a minimum of two (2) feet high at the time of planting.

(d) Landscaping may be informal with multiple species arrayed in naturalistic clusters.

(e) All vinyl fencing is prohibited with the boundary of the Coal Mountain Overlay.

(f) Sixty (60%) percent of all required trees in landscape strips along the proposed future rights-of-way of SR 369, SR 9, and SR 306 shall be Nuttall Oak. Thirty-three (33%) percent of all required trees in landscape strips along the proposed future rights-of-way of Whitmire Road, Wallace Tatum Road, Dr. Bramblett Road, Elmo Road, John Burruss Road, Bannister Road, Hubert Martin Road, Gravitt Road, Spot Road, Setting Down Road, Freedom Parkway, Martin Road, Holtzclaw Road, Burruss Mill Road, and Shady Grove Road shall be Nuttall Oak.

(g) Within the boundary of the Coal Mountain Node, forty (40%) percent of all required trees in landscape strips along the proposed future rights-of-way of SR 369 and SR 9 shall be Redbud ‘The Rising Sun.’ Thirty-three (33%) percent of all required trees in landscape strips along the proposed future rights-of-way of Setting Down Road shall be Redbud ‘The Rising Sun.’

(h) Within the boundary of the Hammond’s Crossing Node, forty (40%) percent of all required trees in landscape strips along the proposed future rights-of-way of SR 369 and SR 306 shall be Black Gum ‘Wildfire.’ Thirty-three (33%) percent of all required trees in landscape strips along the proposed future rights-of-way of Martin Road shall be Black Gum ‘Wildfire.’

(i) Within the boundary of the Matt Node, forty (40%) percent of all required trees in landscape strips along the proposed future rights-of-way of SR 369 shall be Florida Dogwood ‘Cherokee Princess.’ Thirty-three (33%) percent of all required trees in landscape strips along the proposed future rights-of-way of Dr. Bramblett Road, Elmo Road, John Burruss Road, and Bannister Road shall be Florida Dogwood ‘Cherokee Princess.’

(j) The Director shall have the discretion to modify required tree species as required by UDC 21-12.5(f-i) and, in the discretion of the Director, to authorize fencing to substitute for all or a portion of the required landscape strip.

(4) For residential projects over twenty-five (25) acres, a landscaped entrance median shall be required. Planting shall include a combination of perennials, annuals, and shrub material. The use of understory trees is encouraged.

(5) Species selected for installation within the Coal Mountain Overlay boundary shall be chosen from Table 21.4. Native plant choices are preferred for hardiness and water requirements. Cultivar alternatives for species identified in Table 21.4 to be approved by the County Arborist.

(6) Administrative Variance. Notwithstanding any other provision in the UDC, the landscape strip requirements in the Coal Mountain Overlay may be administratively varied to a minimum of no less than fifteen (15) feet, based upon the following:

(a) Applicant may submit a variance application to the department for administrative approval by the director;

(b) An administrative variance shall be issued if the following conditions are satisfied:
1. The spirit and intent of the Overlay is otherwise achieved by the reduced landscape strip;
2. That for every linear foot of requested variance, the applicant shall be required to contribute landscaping recompense funds for expenditure on rights-of-way beautification within the Coal Mountain Overlay District;
3. For every linear foot of requested variance, a recompense multiplier of four times (4x) shall be applied;
4. The calculation for landscaping recompense shall be based upon the following model. [The required twenty (20) foot landscaping strip per the Overlay is estimated to cost $50.00 per linear foot. If an applicant has 100 feet of frontage, then it is estimated that landscaping will cost $5,000 to install ($50 x 100). If an applicant seeks a five (5) foot variance along the entire frontage, thereby reducing the landscape strip from twenty (20) feet to fifteen (15) feet (a 25% reduction), this would equate to $12.5 in landscaping savings ($50 x .25). Applying the four times (4x) multiplier to $12.5 yields a $50 per linear foot recompense contribution for the frontage, thereby requiring the applicant to recompense the County $5,000 ($50 x 100 feet), in addition to installing the fifteen (15) foot landscaping strip along the frontage. Under this hypothetical scenario, the result would be an estimated cost of $3,750 to install the fifteen (15) feet of landscaping along the frontage ($37.5 x 100), as...
well as a $5,000 recompense contribution to the County, resulting in a total expenditure of $8,750.

5. If a variance is sought that would reduce the landscape strip to less than fifteen (15) feet, then that additional variance reduction must be pursued in accord with those procedures set forth in section 8-6.3 and 8-6.4 of the UDC, respectively.

(7) The following shall not be planted within the Coal Mountain Overlay District:
Ailanthus altissima (tree-of-heaven)
Albizia julibrissin (mimosa)
Alternanthera philoxeroides (alligator weed)
Cupressocyparis leylandii (leyland cypress)
Eichhornia crassipes (water hyacinth)
Elaeagnus pungens (thorny olive)
Elaeagnus umbellate (autumn olive)
Hedera helix (English ivy)
Hemerocallis ‘Stella de Oro’ (stella d’oro daylily)
Hydrilla verticillata (hydrilla)
Ilex x attenuata (savannah holly)
Imperata cylindrica (congongrass)
Juniperus virginiana (red cedar)
Lespedeza bicolor (shrubby lespedeza)
Lespedeza cuneata (sericea Lespedeza)
Ligustrum japonicum (Japanese privet)
Ligustrum sinense (Chinese privet)
Lonicera japonica (Japanese honeysuckle)
Lonicera maackii (amur honeysuckle)
Lygodium japonicum (Japanese climbing fern)
Melia azedarach (chinaberry)
Microstegium vimineum (Nepalese browntop)
Miscanthus sinensis (Chinese silvergrass)
Murdannia keisak (marsh dayflower)
Nandina domestica (sacred bamboo)
Paulownia tomentosa (princess tree)
Phyllostachys aurea (golden bamboo)
Pinus (pine)
Pueraria Montana var. lobata (kudzu)
Prunus (cherry)
Prunus laurocerasus ‘Otto Luyken’ (otto luyken laurel)
Prunus laurocerasus ‘Schipkaenis’ (schip laurel)
Raphiolepis indica (indian hawthorn)
Rosa multiflora (multiflora rose)
Rosa radrazz (knockout rose)
Sesbania herbacea (bigpod sesbania)
Sesbania punicea (red sesbania)
Spiraea japonica (Japanese spiraea)
Triadica sebifera (Chinese tallow tree)
Vinca major (big periwinkle)
Vinca minor (common periwinkle)
Wisteria sinensis (wisteria)

(8) **Landscape Installation and Maintenance.** Certification by a registered landscape architect verifying that landscaping meets the standards of this code must be provided at the time of the landscape plan submittal. In addition, the contractor responsible for landscape installation must certify that all plant material has been installed per the approved plans. These certifications must be submitted prior to the approval of the as-built and/or final plat. The Property Owner shall be responsible for maintenance of required landscaping. All dead and damaged plant material within landscaped areas must be replaced with a similar species within one month. If weather conditions are not appropriate for replanting, the property owner may postpone replacement for up to six (6) months. Replacement trees and shrubs shall be of similar size to trees or shrubs being replaced.

(D) **Civic Space.** The inclusion of civic space in future site development is highly desired. Examples of civic space include, but are not limited to a passive or active park, pocket park, square, plaza, playground, as well as the inclusion of public art installations.
(E) **Building Placement.** Within the boundaries of identified nodes, one of the following two options are required:
   1. Buildings must adhere to a maximum setback of five (5) feet in addition to the landscape strip requirements set forth in section 21-12.5(C)(2) or
   2. Distributed parking along not less than two sides of the building exterior must be provided; parking that fronts the main building entrance(s) shall not exceed fifty (50%) percent of parking total.

(F) **Bicycle Parking.** Accessory off-street parking for bicycles that provide racks or equivalent structures in or upon which the bicycle may be locked by the user are required.
   1. For non-residential uses, a minimum number of bicycle parking spaces shall be provided, equal to two and one half (2.5%) percent of the total number of automobile parking spaces provided, but no less than two (2) spaces and no more than twelve (12) spaces. For residential amenity areas, a minimum of six (6) bicycle parking spaces shall be provided.
   2. Bicycle parking facilities shall be located no further than one hundred (100) feet away from a building entrance.
   3. Bicycle facilities shall not be located in places that impede pedestrian or automobile traffic flow or that would cause damage to landscaping.

(G) **Buffers.** Excluding stream buffers, buffers may be disturbed for grading and development of a site, but shall otherwise meet the requirements of Forsyth County Buffer Standards.

(H) **Screening.** In addition to the regulations set forth in Chapter 12 and Chapter 14, the following standards shall apply:
   1. Loading areas shall be screened from the right-of-way and from view of public areas. These areas shall be separated from the primary vehicular and pedestrian circulation areas.
   2. All dumpsters and compactors shall be enclosed on three sides by materials and architectural elements to match the primary structure and gated on the fourth side.
      (a) The enclosure shall be at least one (1) foot taller than the highest point of the dumpster or compactor.
      (b) The gate shall be composed of decorative metal or other durable materials which shall reach the height of the three sided enclosure and with colors coordinated with those of the primary structure. Chain link material is prohibited.
      (c) All dumpsters and compactors shall be equipped with lids.
   3. Drive-thru facilities and stacking lanes, when contiguous to any public right-of-way, residential use, or pedestrian gathering area shall be obscured from view by an earthen berm and/or a vegetative screen planted according to County buffer standards.
      (a) Stacking lanes and bypass lanes shall be designed in a manner so that vehicle queuing does not interfere with access driveways, interparcel connections, or maneuverability in and out of off-street parking spaces. No drive-through shall exit directly onto the right-of-way.
      (b) Car wash openings shall be oriented away from the right-of-way.
   4. For permitted open air businesses, no chain link fence shall be visible from the right-of-way.
   5. Businesses requiring a fleet of service vehicles shall park such vehicles behind the building or otherwise provide adequate screening to ensure the vehicles are not visible from the public right-of-way.
   6. Storage of shopping carts shall be located indoors. Where indoor storage is not feasible, shopping carts shall be located adjacent to the building and screened by an enclosure made of masonry to match the exterior building materials.
      (a) Shopping cart corrals in parking areas shall be curbed within parking islands so that additional railings are not required for secure cart positioning.
      (b) Parking islands that contain cart corrals must include four hundred (400) square feet of landscaped space.
      (c) One (1) identifying sign at the rear of each corral is permitted for visibility within the parking lot.
      (d) Ground mounted equipment, such as power transformers and light poles, are prohibited within required landscape parking islands.

21-12.6 **Signage.** This section establishes minimum standards to promote and ensure a cohesive and unified identification program within the overlay district. A detailed signage plan is required to be submitted that addresses and conforms to all provisions set forth in this section. In addition to Ordinance No. 74 (Sign Ordinance), the following shall apply:
(A) Temporary signs, including inflatable or forced-air signs, tarps, banners, sign dancers, and any sign mounted on wheels, are prohibited within the boundary of the Coal Mountain Overlay. Permanent and temporary signs in windows are also prohibited.

(B) Wall signs and monument signs shall not be of the singular plastic insert or panel sheet variety. Channel letters are strongly encouraged for both monument and wall signs. If internally illuminated, lettering shall be individually formed and lighted.

(C) Monument sign structure and base materials shall be compatible with the color, texture, material, and architectural design of the principal building.

(D) Freestanding signs shall adhere to standards outlined in the chart below:

<table>
<thead>
<tr>
<th>Gross Building Space</th>
<th>Maximum Height of signs</th>
<th>Maximum Number Allowed</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 - 10,000</td>
<td>6'</td>
<td>1 per Road Frontage</td>
</tr>
<tr>
<td>10,001 - 50,000</td>
<td>8'</td>
<td>1 per Road Frontage</td>
</tr>
<tr>
<td>50,001 - 100,000</td>
<td>10'</td>
<td>1 per Road Frontage</td>
</tr>
<tr>
<td>100,000 +</td>
<td>12'</td>
<td>2 per Road Frontage</td>
</tr>
</tbody>
</table>

(E) Electronic message boards or changeable copy are permitted for fuel station monument signs, one per road frontage. The total electronic or changeable copy area for each sign shall not exceed a total of forty-six (46) square feet.

(F) Wall mounted raceways shall be painted to match the adjoining structure.

(G) Fuel station canopy signs are allowed, one per road frontage not to exceed twenty (20) square feet. Sign must be flush against the canopy fascia. The canopy shall not exceed twenty-five (25) feet in height from the ground to the top of the fascia. Banding of corporate colors shall be considered part of the sign and shall count toward the allowable twenty (20) square feet.

(H) Within nodes, where increased pedestrian activity is desired and anticipated, adherence to Ordinance No. 74 Pedestrian-Oriented Project performance standards is strongly encouraged. These regulations allow for smaller, more numerous signs with a greater variety of sign types in order to foster an enhanced, walkable environment.

(I) **Community Branding Signage.** Commercially zoned properties directly adjacent to the intersections of Highways 306 and 369, Highways 9 and 369, and Highway 369 and Burruss/Bannister Road are authorized, but not required, to erect a single community branding monument sign on their property, the square footage of which shall not count against any other sign allowance under this Code or the Forsyth County Sign Ordinance nor shall such signage reduce the overall number of signs allowed on the property. Any such community branding sign shall be configured such that it is viewable by the motoring public while traveling through the intersection. The community monument sign may be constructed within any applicable buffer or setback in order to achieve optimal visibility to the traveling public, but any such disturbance in a buffer or setback shall be mitigated by additional plantings and landscaping as recommended by the county arborist. The monument sign shall have a height of no more than three (3) feet from grade to top, a length of no more than twenty (20) feet, and channel letters of at least nine (9) inches each identifying the community where it is located. The monument sign shall be externally lighted. A property owner seeking to erect a community branding sign in accord with this paragraph shall provide a certification to the Director, on a form to be prepared by the Department, that the sign will remain a community branding sign.

1. For purposes of this subsection, at Highways 306 and 369 the properties eligible for a community branding sign are tax parcels 239-243, 239-008, 239-006, and 238-007; at Highways 9 and 369, the
eligible tax parcels are 216-037, 190-028, 190-021, and 190-027; at Highway 369 and Burruss/Bannister Road, the eligible tax parcels are 145-015, 145-026, 119-022, and 119-015.

21-12.7 Lighting. Lights shall be installed per the following standards at a consistent spacing as required by staff:

(A) For any commercial use within identified nodes, a freestanding pole light utilizing LED fixtures shall not exceed thirty-five (35) feet in height and shall have a black metal finish. A freestanding pole light utilizing non-LED fixtures shall not exceed twenty-five (25) feet in height and have a black metal finish.

(B) For all residential areas, a freestanding pole light shall not exceed sixteen (16) feet in height and have a black metal finish.

(C) The use of LED garland or string lights to outline windows, buildings, signs, and similar features is prohibited.

(D) Neon tube lighting is prohibited.

(E) Building mounted lighting shall highlight architectural features and not illuminate the entire building façade.

(F) All canopy luminaries shall be fully recessed and utilize flat lenses.

21-12.8 Architectural Design Standards. The architectural design standards established herein apply to all development. They are intended to contribute to the overall character of the overlay district. The architectural criteria listed below establish minimum design standards for buildings within the overlay district in order to reduce the impacts of development on adjacent properties. These standards are in addition to the design criteria contained in Chapters 11, 12, and 14:

(A) Commercial Architecture. The following requirements shall not apply to industrial or mining zoning districts.

(1) The use of muted, subdued or earth tone colors are required.

(2) Building materials for commercial districts:

<table>
<thead>
<tr>
<th>Allowed</th>
<th>Prohibited</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brick</td>
<td>Tilt/Precast</td>
</tr>
<tr>
<td>Stone</td>
<td>Concrete Block including Smooth and Split-face Non-architectural grade metal, excluding roofs</td>
</tr>
<tr>
<td>Glass</td>
<td>Tile</td>
</tr>
<tr>
<td>Stucco</td>
<td></td>
</tr>
<tr>
<td>Max. 50% per facade</td>
<td></td>
</tr>
<tr>
<td>Cementitious and Wood Siding-</td>
<td></td>
</tr>
<tr>
<td>Max. 50% per facade</td>
<td></td>
</tr>
<tr>
<td>Architectural grade metal: Max. 50% per facade.</td>
<td></td>
</tr>
<tr>
<td>Prefabricated steel buildings shall not have vertical corrugated seam metal siding and shall have a variety of materials incorporated into the design.</td>
<td></td>
</tr>
</tbody>
</table>

(3) Façades over fifty (50) feet in length must incorporate wall projections or recesses a minimum of twelve (12) inches in depth. The combined length of said recesses and projections must constitute at least twenty (20%) percent of the total façade length.

(4) Variation in the roofline of buildings and offsets in pitched roofs and gables are required. Parapets in individual building façades exceeding one hundred (100) continuous linear feet must be varied in height and projection and must use decorative elements such as crown moldings, dentils, brick soldier courses, or similar details.

(5) Burglar bars, fiberglass awnings, exterior roof access ladders, and steel-roll down curtains are prohibited.

(6) Structured parking facilities shall consist of materials and architectural elements that complement the primary structure.

(7) Covered structures within parking lots are prohibited.

(8) Retaining walls shall be faced with stone and brick when visible from the right-of-way.

(9) Canopy structures shall not exceed twenty-five (25) feet in height and include a decorative cornice roofline design on all four side of the canopy structure to match the principal building in color. Columns shall be faced with full height brick or stone that matches or compliments the finish of the primary building.
Buildings shall be designed to avoid large, uninterrupted facades. Window and door openings, varied front façade setbacks, material variation, a palette of colors, a variety of roof types, tower features, parapets, awnings, cornices, canopies, corbels, bandings, moldings and other architectural embellishments and details shall be used to promote architectural features that recognize a human scale.

Within nodes, an increase in building height allowance of up to an additional thirty-five (35) feet shall be granted if the building adheres to the building placement requirements set forth in section 21-12.5(E)(1) and the development provides civic space as defined in section 21-12.5(D). The increase in building height shall be permitted in commercial and office zoning districts.

Within nodes, at least five (5%) percent of the total land area of a commercial development shall be used as common area. This area shall be located between the primary building entrance and the right-of-way and include some combination of seating, fountains, landscaped focal point, public art installation, or similar features. Bicycle parking shall not count toward the common area requirement.

Sidewalks shall connect the rights-of-way with all main building entrance(s). Sidewalks shall be no less than five (5) feet in width. For commercial projects within nodes, sidewalks may be permitted within required landscape strips on a case-by-case basis upon thorough review of the landscape plan in order to still meet the intent of this Code and protect the public health, safety, and welfare.

Stormwater detention and retention ponds that require a fence must not be visible from the public right-of-way unless a twenty-foot (20’) planted buffer is provided outside of the exterior pond fence. Access to the pond shall not be facing the public right-of-way.

(B) **Residential Architecture.**

1. Residential structures along existing public right-of-way shall require any side or rear facade that is visible from the public right-of-way to include the same exterior finish materials and similar landscaping as the front of the structure. In addition, it shall include windows and architectural features similar to the front façade, including but not limited to, awnings, cornice work, edge detailing or other decorative finish materials.

2. All roof vents, pipes, antennas, satellite dishes, and other roof equipment (except chimneys) shall be located on the rear elevations and except for satellite dishes be painted to match the color of the roof or, if technical considerations prevent installing satellite dishes on the rear elevation, then such equipment shall be installed at a location where it will have minimal visual impact as seen from the street.

3. Trash enclosures in amenity areas and lots are to be constructed with a walk-in entrance, solid metal gates, and a decorative cover. Enclosures shall have sufficient size to house both the recycling and refuse bins.

4. Utility equipment and service meters are to be located away from high visibility and usage areas and effectively screened from view. The use of enclosed structures or interior access to utility equipment and meters is encouraged. The use of utility closets on exterior walls is prohibited.

5. Common mail facilities shall be covered, include a trash receptacle, and provide a minimum of two dedicated parking spaces if not located within an amenity area.

6. Retaining walls shall be faced with stone and brick when visible from the right-of-way.

7. Multi-family residential buildings shall utilize a mixture of materials including brick, stone, cementitous siding, stucco/EIFS, and/or have the appearance of a commercial storefront. Use of materials should vary and not exceed 50% of any one type per building side to provide visual interest.
