## **Explanation**

Finding suitable Election Day polling places throughout the county that can support a specified area of the voter population can be challenging. Not only must a polling place meet certain compliance criteria set forth by the state and our office, the polling place must be able and willing to accept the huge responsibility that comes with the production of an election. Our current polling places have served the county voters well and will continue to do so in the upcoming 2020 election cycle. After an election cycle has ended, our office conducts an analysis of each polling place to determine if any adjustments are needed to ensure we can continue to accommodate our voters comfortably and safely in the next election cycle. Many factors are considered when measuring the effectiveness of a polling place, including size of the polling place, growth of the precinct, parking availability, ADA compliance and traffic safety.

After evaluating the 2018 election cycle and anticipating that the 2020 election cycle will be even busier, the Forsyth County Board of Voter Registrations and Elections and the Department staff have determined that adjustments to some precincts and polling places are warranted. Many discussions on viable options with regards to making precinct and polling place changes for the upcoming 2020 election cycle to accommodate our growing population throughout the county have taken place during the first half of this year. One proposed solution is to open additional Election Day polling places. With this solution comes the challenge of finding polling locations that meet our needs and requirements and can meet the responsibilities of being a polling location. For the 2020 election cycle, we are fortunate to have found 5 locations that meet our needs and are able to serve in the capacity of an Election Day polling place. With the addition of these 5 Election Day polling places, several precinct lines will be altered.
